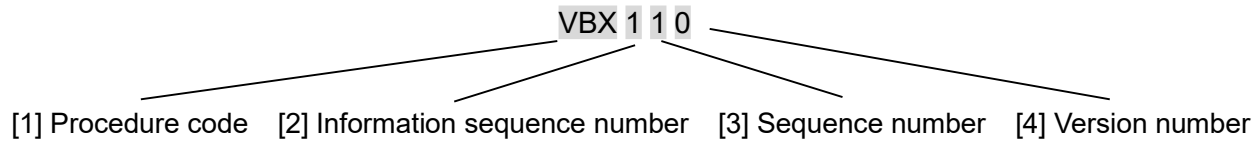
## Appendix12-3 Subset Names of Procedures Supported by EDIFACT

In procedures supported by EDIFACT of NACCS, as a result of one message type is used for multiple procedures, there are different mapping tables for one message type. Therefore, a subset name is set in S009-0065 (Message type) of the UNH segment, and the translator uses it as the key to select the mapping table of the relevant procedure. For subset names of different procedures, see "Table A12-3-1 List of Subset Names of Procedures Supported by EDIFACT."

Shown below is the system of the relevant subset names.



[1] Procedure code: Code for each procedure

[2] Information sequence number: Number that identifies each output data block when there are multiple output data blocks related to one procedure code

[3] Sequence number: Numbering starting from 1

[4] Version number: Always set to 0.

# Table A12-3-1 List of Subset Names of Procedures Supported by EDIFACT

| Item No. | Procedure Code | Procedure Name | Output Information Code | Output Information Name | Subset Name | Using Message | Remarks |
|---|---|---|---|---|---|---|---|
| [Arrival/departure and tonnage due procedures] | | | | | | | |
| <Sea Procedures> | | | | | | | |

*1 (1) The Passenger Manifest Report (subset name: PLR110 and PLR210) and the Crew List Report (subset name: NLR110 and NLR210) described in this document are supposed to be submitted via the communication line provided by auronautical communication companies.

Please be noted that these procedures cannot be performed by the method described in "4.43.2 E-mail Style Processing Mode by EDIFACT message" in the EDI specification.

(2) Subset names PLR110 and NLR110 must conform to the specification of the UN-EDIFACT standard messages below.

[UN-EDIFACT]

APIS-U.S. Manifest/MCL(PAXLST) Message Implementation Guideline for Airlines

UN/EDIFACT Message Set

August 17, 2005

Document Number: 2099001-UN-IMPLEMENTATION-GUIDE-1.02

(3) Subset names PLR210 and NLR210 must conform to the specification of the US-EDIFACT standard messages below.

[US-EDIFACT]

API for Airlines

Project Number:9201

Document Number:OIT-SDD-ESB-TECS-EDIFACT_AIR

Revision Number & Date:Version 1.3 January 31, 2002

(4) The message version number is "D", and the message release number is "02B".

*2 Only the CMF02 procedure is supported.

*3 EDIFACT-specific MFR procedure that can register the B/L information and the container information individually The MFR21 and CMF21 procedures correspond to the MFR and CMF01 procedures, respectively. The CMF02 procedure is not supported.

*4 *SMFR21:Process Result Output for the B/L part of the MFR21 procedure

*SMFR22: Process Result Output for the container part of the MFR21 procedure

*SCMF21: Process Result Output for the B/L part of the CMF21 procedure

*SCMF22: Process Result Output for the container part of the CMF21 procedure

*5 Only the CMR procedure is supported.

*6 Only the CHR procedure is supported.

*7 Message version number is "D", and message release number is "17A".
