

Table A7-2 List of Accumulative Processing Procedures (Division Processing (Pattern1))

(Note) This table describes the processing content, etc. when an "Accumulative Processing procedure" is used for division processing in place of the "original procedure".

Original Procedure		Invocation Timing of Accumulative Processing Procedure	Accumulative Processing Procedure	Processing Details	Processing Unit	Existence of Process Result Output
<Air-Sea Common Procedures>						
CSN01	Notification of cargo status	When outputting notification of cargo status information more than 101 cargoes and containers	1CN	Notification of cargo status (Accumulative Processing)	In units of 100 notification reservation informations	—
<Sea Related Procedures>						
ATD	Departure Time Registration	—	1AR	Departure time registration (accumulative processing)	In units of 20 B/Ls	—
DNC	Application for Cargo Discharge Permission	—	1DN	Application for Cargo Discharge Permission (accumulative processing)	In units of 20 B/Ls	Error notification information (Application for Cargo Discharge Permission)
CDE01	Completion of Examination of Application for Cargo Discharge Permission	—				Discharge permit notice information Re-approval requirement notice information (Application for Cargo Discharge Permission)
CMV	Update Registered Vessel Information for Advance Filing	—	1CM	Update Registered Vessel Information for Advance Filing (Accumulative processing)	In units of 20 B/Ls	Error Notification (Update Registered Vessel Information for Advance Filing (Blanket))
MFI	Manifest Information Registration (Blanket)	—	1MR	Manifest Information Registration (Blanket) (Accumulative processing)	In units of 1 B/L	Manifest Information Registration Result Listing Information
CMC	Update Manifest Information (Collective Change of CY)	—	1MC	Update Manifest Information (Collective Change of CY) (accumulative processing)	In units of 20 B/Ls or in units of 20 containers	Error Notification (Update Manifest Information (Collective Change of CY))
DMF	Manifest Submission	—	1MF	Manifest Submission (accumulative processing)	In units of 20 containers or in units of 20 B/Ls	—
DMF	Manifest Submission	When house B/L is associated with the target master B/L	1MJ	Import declaration before the arrival of cargo (House) (automatic startup of the final declaration)	In units of 20 B/Ls	—
DMF	Manifest Submission	When no cargo subject to advance vessel registration is registered for the manifest information for the vessel information AND When B/L for which the vessel information is registered exists in the registered Advance Cargo Information Registration However, this does not apply to cases when the System is registered that the function of registering cargo manifest information using Advance Cargo Information Registration is not required	1MD	Manifest Submission Information Registration (Accumulative processing)	In units of 1 B/L	Manifest Information Registration Result Listing Information
PID	Arrival Date Registration	—	1PD	Arrival Date Registration (accumulative processing)	In units of 20 B/Ls	—
PKK	Discharge confirmation registration (Separate)	—	1PK01	Discharge confirmation registration (accumulative processing)	In units of 1 containers or in units of 20 B/Ls	Error notification information (discharge information)
PKI	Discharge confirmation registration (blanket registration)	—	1PK02	Discharge confirmation registration (accumulative processing)	In units of 20 containers, in units of 20 B/Ls	Error notification information (discharge information)
DCL02	Discharge Container Information Registration (submission)	—	1DC	Discharge Container Information Registration (accumulative processing)	In units of 20 container	Error notification information (discharged container information)
CYO	Registration of confirmation of CY carry-out	For containers with more than 101 registered Export Control Numbers	1CO	Registration of confirmation of CY carry-out (accumulative processing)	In units of 100 B/L Numbers / Export Control Numbers	Error notification (by Export Control Number)
BIA	Carry-in confirmation registration (General Customs Transit cargo)	—	1BA	Carry-in confirmation registration (General Customs Transit cargo) (accumulative processing)	In units of 1 B/L	Process Result Output (for the processing unit)

Original Procedure		Invocation Timing of Accumulative Processing Procedure	Accumulative Processing Procedure	Processing Details	Processing Unit	Existence of Process Result Output
BIA	Carry-in confirmation registration (General Customs Transit cargo)	When House B/L Cargo Information Registration is processed for ocean B/L	1BB	House B/L Cargo break-bulk Confirmation Registration (accumulative processing)	In units of 10 house B/Ls	Process Result Output (for the processing unit) (output in units of 1 house B/L)
CTS	Registration of confirmation of consolidated cargo	—	1BA	Carry-in confirmation registration (General Customs Transit cargo) (accumulative processing)	In units of 1 B/L	Process Result Output (for the processing unit)
CTS	Registration of confirmation of consolidated cargo	When House B/L Cargo Information Registration is processed for ocean B/L	1BB	House B/L Cargo break-bulk Confirmation Registration (accumulative processing)	In units of 10 house B/Ls	Process Result Output (for the processing unit) (output in units of 1 house B/L)
CYE	Confirmation of CY carry-in outside the system (bulk carry-in)	—	1CY	Confirmation of CY carry-in outside the system (bulk carry-in) (accumulative processing)	In units of 20 containers or in units of 20 B/Ls	—
NVC01	House B/L Cargo Information Registration	—	1BA	Carry-in confirmation registration (General Customs Transit cargo) (accumulative processing)	In units of 1 B/L	Process Result Output (for the processing unit)
NVC01	House B/L Cargo Information Registration	When House B/L Cargo Information Registration is processed for ocean B/L	1BB	House B/L Cargo break-bulk Confirmation Registration (accumulative processing)	In units of 10 house B/Ls	Process Result Output (for the processing unit) (output in units of 1 house B/L)
NVC01	House B/L Cargo Information Registration	When master B/L is associated with the house B/L for which pre-arrival declaration concerning import declaration before cargo arrival is made	1MJ	Import declaration before the arrival of cargo (House) (automatic startup of the final declaration)	In units of 20 B/Ls	—
NVC02	House B/L Cargo Information Registration (association)	When master B/L is associated with the house B/L for which pre-arrival declaration concerning import declaration before cargo arrival is made	1MJ	Import declaration before the arrival of cargo (House) (automatic startup of the final declaration)	In units of 20 B/Ls	—

Original Procedure		Invocation Timing of Accumulative Processing Procedure	Accumulative Processing Procedure	Processing Details	Processing Unit	Existence of Process Result Output
SAT	Customs Transit Arrival Confirmation Not Covered the System	—	1BA	Carry-in confirmation registration (General Customs Transit cargo) (accumulative processing)	In units of 1 B/L	Process Result Output (for the processing unit)
SAT	Customs Transit Arrival Confirmation Not Covered the System	When House B/L Cargo Information Registration is processed for ocean B/L	1BB	House B/L Cargo break-bulk Confirmation Registration (accumulative processing)	In units of 10 house B/Ls	Process Result Output (for the processing unit) (output in units of 1 house B/L)
FTR	Registration of free time information	When Container Number or B/L Number is entered	1FT	Registration of free time information (accumulative processing)	In units of 20 containers or in units of 20 B/Ls	Error notification information (Free Time Registration)
VAA	Addition of vanning information	For containers with more than 101 registered Export Control Numbers	1VA	Addition of vanning information (Accumulative Processing)	In units of 100 B/L Numbers / Export Control Numbers	—
VAC	Cancellation of vanning information	In the case of collective cancellation in units of Export Control Numbers, etc.	1VV	Correction of vanning information (accumulative processing)	In units of 1 container	—
VAC	Cancellation of vanning information	For containers with more than 101 registered Export Control Numbers	1VC	Cancellation of vanning information (Accumulative Processing)	In units of 100 B/L Numbers / Export Control Numbers	Error notification (by Export Control Number)
VAD	Correction of vanning information	In the case of correction of cargo information	1VV	Correction of vanning information (accumulative processing)	In units of 1 container	—
VAD	Correction of vanning information	For containers with more than 101 registered Export Control Numbers	1VD	Correction of vanning information (Accumulative Processing)	In units of 100 B/L Numbers / Export Control Numbers	—
CYA	Registration of confirmation of CY carry-in	For containers with more than 101 registered Export Control Numbers	1TA	Registration of confirmation of CY carry-in (Accumulative Processing)	In units of 100 B/L Numbers / Export Control Numbers	Error notification (by Export Control Number)
CYC	Correction of CY carry-in information	For containers with more than 101 registered Export Control Numbers	1TC	Correction of CY carry-in information (Accumulative Processing)	In units of 100 B/L Numbers / Export Control Numbers	Error notification (by Export Control Number)
CLR	Register Loading Information	—	1CB	Register Loading Information (accumulative processing) (internal processing)	In units of 300 containers per container manager or in units of 300 B/L Nos. / Export control Nos.	Error notification information (loading information) (output in units of vessels/ports)
CLR	Register Loading Information	—	1CB	Register Loading Information (accumulative processing) (internal processing)	In units of 300 containers per container manager	In the case of "Loaded Container Information Registration"; Error notification information (loaded container information) (output in units of container managers) In the case of other than "Loaded Container Information Registration"; Error notification information (loading information)
CLR	Register Loading Information	—	1CB	Register Loading Information (accumulative processing) (internal processing)	In units of 300 containers or in units of 300 B/L Nos. / Export control Nos.	Error notification information (loading information) (output in units of vessels/ports)
CLR	Register Loading Information	—	1CL	Register Loading Information (accumulative processing)	In units of vessels/ports	Error notification information (loading information)

Original Procedure		Invocation Timing of Accumulative Processing Procedure	Accumulative Processing Procedure	Processing Details	Processing Unit	Existence of Process Result Output
CLD	Changes to loading information	—	1CB	Register Loading Information (accumulative processing) (internal processing)	In units of 300 container	Error notification information (loading information) (output in units of vessels/ports)
CLD	Changes to loading information	—	1CB	Register Loading Information (accumulative processing) (internal processing)	In units of 300 containers or in units of 300 B/L Nos. / Export control Nos.	Error notification information (loading information) (output in units of vessels/ports)
CCL	Loading Confirmation Registration	—	1CC	Registration of confirmation of loading (accumulative processing)	In units of 20 containers or in units of 20 B/L Nos. / Export control Nos.	—
ACL01	ACL Information Registration (For Container Vessels)	—	1AL	ACL Information Registration (for container vessels) (accumulative processing)	In units of 10 house booking numbers	—
RCL01	Registration of Payment	—	1RC	Registration of Payment (automatic invocation of payment registration)	Customs office, Account for lump payment slip number	—
CCX	Registration of the cargo status	For containers with more than 101 registered Export Control Numbers	1CX	Registration of the cargo status (accumulative processing)	In units of 100 B/L Numbers / Export Control Numbers	—
CYL	Coastal Vessel Feeder Transport Loading Registration	-	1LC	Coastal Vessel Feeder Transport Loading Registration (Accumulative Processing)	for Each Container	Error notification (Coastal vessel loading information)
CYU11	Coastal Vessel Feeder Transport Landing Cargo call-up	In the case of imported containers landing batch processing	1UC	Coastal Vessel Feeder Transport Landing Cargo Registration (Accumulative Processing)	for Each Container	Error notification (landing information)
CYU	Coastal Vessel Feeder Transport Landing Cargo Registration	-	1UC	Coastal Vessel Feeder Transport Landing Cargo Registration (Accumulative Processing)	for Each Container	Error notification (landing information)
SKA	Registration of advance information about consolidated cargo	In the case of automatic registration of cargo information	1NV	House B/L Cargo Information Registration (automatic startup)	In units of 20 house B/Ls	Error Notification (House B/L Cargo Information Registration (automatic startup))

Original Procedure		Invocation Timing of Accumulative Processing Procedure	Accumulative Processing Procedure	Processing Details	Processing Unit	Existence of Process Result Output
<Air Related Procedures>						
BIL	Call-up for the registration of bulk carry-in confirmation	When carried in by simple processing without call up of exported cargo information	1BL	Carry-in confirmation (accumulative processing)	In units of 1 carry-in document number or in units of 16 AWBs (HAWBs) per 1 LDR	Error notification information (carry-in confirmation) (in the case of the occurrence of an internal error)
CLA01	Registration of loading completion (by flight)	—	1CS	Loading completion A (accumulative processing)	In units of 20 AWBs per 1 loading flight or in units of 1 ULD (MAWB)	Error notification information (loading completion) (in the case of the occurrence of an internal error)
CLB01	Registration of loading completion (by AWB)		1CU	Loading completion B (accumulative processing)	In units of 20 AWBs (HAWBs) per 1 loading flight or in units of 1 ULD (MAWB)	Error notification information (loading completion) (in the case of the occurrence of an internal error)
CLF01	Registration of forced termination of loading completion		1FL	Loading completion C (accumulative processing)	In units of 1 AWB (MAWB)	Error notification information (loading completion) (in the case of the occurrence of an internal error)
			1MW	Loading completion D (accumulative processing)	In units of 1 HAWB (including MAWB update)	Error notification information (loading completion) (in the case of the occurrence of an internal error)
FLI01	Registration of information about the allocation of loading flights	—	1FS	Allocation of loading flights A (accumulative processing)	In units of 6 AWBs (MAWBs) per 1 loading flight or in units of 1 ULD	Error notification information (loading flight assignment) (in the case of the occurrence of an internal error)
FLF01	Correction of information about the allocation of loading flights		1FU	Allocation of loading flights B (accumulative processing)	In units of 6 AWBs (MAWBs) (including ULD update in the case of ULD packed)	Error notification information (loading flight assignment) (in the case of the occurrence of an internal error)
IWH	Inquiry about the inventory status of bonded warehouses (export)	When list information is output	1WH	Inquiry about the inventory status of bonded warehouses (export) (accumulative processing)	In units of 48 AWBs (HAWBs)	Bonded Warehouses Inventory Status Inquiry (export) list information
EXU	Registration of carry-out confirmation (by ULD)	—	1XU	Registration of carry-out confirmation (by ULD) (accumulative processing)	In units of 20 AWBs (HAWBs) per 1 ULD	Error notification information (Carry-Out Confirmation Registration (in units of ULDs)) (in the case of the occurrence of an internal error)
EXC	Call-up for the cancellation of carry-out confirmation	When information indicating that carry-out is processed by Carry-Out Confirmation Registration (EXC procedure) is canceled	1XC	Cancellation of carry-out confirmation (accumulative processing)	In units of 20 AWBs (HAWBs) per 1 ULD	Error notification information (Carry-Out Confirmation Cancellation) (in the case of the occurrence of an internal error)
CAT	Customs Transit Arrival Confirmation Not Covered the System	—	1CA	Customs Transit Arrival Confirmation Not Covered the System (accumulative processing)	In units of 18 AWBs (HAWBs) in 1 customs transit declaration	Error notification information (CAT) (in the case of the occurrence of an internal error)
IWI	Inquiry about the inventory status of bonded warehouses (import)	When list information is output	1IW	Inquiry about the inventory status of bonded warehouses (import) (accumulative processing)	In units of 24 AWBs (HAWBs)	Bonded Warehouses Inventory Status Inquiry (import) list information
RCL01	Registration of Payment	—	1RC	Registration of Payment (automatic invocation of payment registration)	Customs office, Account for Lump-Sum Payment Slip Number	—

Table A7-2 List of Accumulative Processing Procedures (Automatic Invocation Processing (Pattern 2))

(Note) This table describes the processing content, etc. when an "Accumulative Processing procedure" is automatically invoked in place of the "original procedure".

Original Procedure		Accumulative Processing Procedure		Processing Unit	Existence of Process Result Output	Invoked Procedure		Invocation Timing of Accumulative Processing Procedure
<Sea Related Procedures>								
EDC	export declaration	1ED	Export declaration (automatic startup)	In units of 1 export declaration	Exist	BIC	Registration of confirmation of carry-in (uncustomed export)	When the entire quantity of cargo, for which information indicating that export declaration on carry-in is to be made is registered, is carried in to distributed warehouses, including the warehouse planned for customs clearance
						CYA	Registration of confirmation of CY carry-in	
						VAN	Registration of vanning information (by container)	
						VAE	Registration of vanning information (by export control number)	
						VAA	Addition of vanning information	
						VAD	Correction of vanning information	
EDC	export declaration	3ED	Export declaration (automatic startup)	In units of 1 export declaration	Exist			Time-based invocation
UEC	Export declarations of unaccompanied articles	1UE	Export declaration of unaccompanied articles (automatic startup)	In units of 1 export declaration of unaccompanied articles	Exist	BIC	Registration of confirmation of carry-in (uncustomed export)	When the entire quantity of cargo, for which information indicating that export declaration of unaccompanied articles on carry-in is to be made is registered, is carried in to distributed warehouses, including the warehouse planned for customs clearance
						CYA	Registration of confirmation of CY carry-in	
						VAN	Registration of vanning information (by container)	
						VAE	Registration of vanning information (by export control number)	
						VAA	Addition of vanning information	
						VAD	Correction of vanning information	
UEC	Export declarations of unaccompanied articles	3UE	Export declaration of unaccompanied articles (automatic startup)	In units of 1 export declaration of unaccompanied articles	Exist			Time-based invocation
DCL02	Discharge Container Information Registration (submission)	1DC	Discharge Container Information Registration (accumulative processing)	In units of 1 Carrier	Exist	PID	Arrival Date Registration	When information indicating that automatic invocation on the moment of Arrival is to be made and arrival confirmation is completed, or when information indicating that Discharged Container Information Registration is to be made with Discharge Confirmation Registration (collective registration) procedure and that the registration is to be made during office operating hours is registered
						PKI	Discharge confirmation registration (blanket registration)	
DCL02	Discharge Container Information Registration (submission)	3DC	Discharge Container Information Registration (automatic startup at the office opening time)	In units of 1 Carrier	Not exist			Time-based invocation
OLC/ OLC20	Customs Transit Declaration	1OT	Customs Transit Declaration (automatic startup upon carry-in)	In units of 1 B/L Number * It can be made in units of multiple B/L Nos. on carry-in	Exist	PKK	Discharge confirmation registration(Separate)	When cargo, for which information indicating that customs transit declaration on carry-in is to be made is registered, is discharged or carried in to the departure location
						PKI	Discharge confirmation registration (blanket registration)	
						BIA	Carry-in confirmation registration (General Customs Transit cargo)	
						CTS	Registration of confirmation of consolidated cargo	
						CYE	Confirmation of CY carry-in outside the system (bulk carry-in)	
						CYA	Registration of confirmation of CY carry-in	
						VAN	Registration of vanning information (by container)	
						VAE	Registration of vanning information (by export control number)	
						VAA	Addition of vanning information	
						VAD	Correction of vanning information	
OLC/ OLC20	Customs Transit Declaration	3OT	Customs Transit Declaration (automatic startup at the office opening time)	In units of 1 customs transit declaration	Exist			Time-based invocation
IDC	Import declaration	1DA	Import declaration (automatic startup upon carry-in)	In units of 1 import declaration, etc.	Exist	PKK	Discharge confirmation registration(Separate)	When cargo, for which information indicating that import declaration on carry-in, etc. is to be made is registered, is discharged or carried in to the warehouse planned for customs clearance
						PKI	Discharge confirmation registration (blanket registration)	
						BIA	Carry-in confirmation registration (General Customs Transit cargo)	
						CTS	Registration of confirmation of consolidated cargo	
						CYA	Registration of confirmation of CY carry-in	

Original Procedure		Accumulative Processing Procedure		Processing Unit	Existence of Process Result Output	Invoked Procedure		Invocation Timing of Accumulative Processing Procedure
IDC	Import declaration	1ID	Import declaration (automatic startup of the final declaration)	In units of 1 import declaration, etc.	Exist	PKK	Discharge confirmation registration(Separate)	When cargo, for which information indicating that pre-arrival import declaration (automatic invocation on carry-in) is to be made is registered, is discharged or carried in to the warehouse planned for customs clearance
						PKI	Discharge confirmation registration (blanket registration)	
						BIA	Carry-in confirmation registration (General Customs Transit cargo)	
						BIB	Confirmation of carry-in outside the system (import cargo)	
						CYA	Registration of confirmation of CY carry-in	
						CTS	Registration of confirmation of consolidated cargo	
						CYB	Confirmation of CY carry-in outside the system (by container)	
						CYD	Confirmation of CY carry-in outside the system (by B/L)	
						CYE	Confirmation of CY carry-in outside the system (bulk carry-in)	
						PID	Arrival Date Registration	
						DMF	Manifest Submission	
						CMF02	Update Manifest Information (After the Manifest Submission procedure)	
						CMF03	Update Manifest Information (Adding Information on Next Port of Discharge)	
						NVC01	House B/L Cargo Information Registration	
						NVC02	House B/L Cargo Information Registration (association)	
IDC	Import declaration	3ID	Import declaration (automatic startup at the office opening time)	In units of 1 import declaration, etc.	Exist			Time-based invocation
IDC	Import declaration	1SW	Single-window import declarations (automatic startup)	In units of 1 import declaration, etc.	Exist	SWC	Single-window import declarations	—
MWC	Import declarations of shipment (carrying out of a comprehensive bonded area) of petroleum products	3MW	Import declarations of shipment (carrying out of a comprehensive bonded area) of petroleum products (automatic startup at the office opening time)	In units of 1 declaration of import from manufacturing warehouse, etc.	Exist			Time-based invocation
CEA	Import declaration examination completion	3CE	Completion of screening of import declarations (automatic startup at the office opening time)	In units of 1 import declaration, etc.	Exist			Time-based invocation
SDC	Simplified import declaration of sea cargo	1SD	Simplified import declaration of sea cargo (automatic invocation of formal declaration)	In units of 1 sea simplified import declaration	Exist	BIA	Carry-in confirmation registration (General Customs Transit cargo)	If cargo for which a preliminary declaration (automatic invocation of formal declaration) related to a sea simplified import declaration, etc. has been registered, the cargo is carried in to the warehouse planned for customs clearance as a result of the relevant business
						CTS	Registration of confirmation of consolidated cargo	
SDC	Simplified import declaration of sea cargo	3SD	Simplified import declaration of sea cargo (automatic invocation during office operating hours)	In units of 1 sea simplified import declaration	Exist			Time-based invocation
COW	Removal of pending	1CW01	Removal of the pending status (automatic startup)	In units of 1 import declaration, etc.	Not exist			When other relevant ministries' procedures laws and ordinances are certified by the system, and when permission/approval of the import declarations, etc. is pending due to waiting for procedures of other laws and ordinances and then the procedures of other laws and ordinances are approved, etc. by procedures related to procedures of relevant ministries and agencies
COW	Removal of pending	3CW	Removal of the pending status (automatic startup at the office opening time)	In units of 1 import declaration, etc.	Not exist	1CW01	Removal of the pending status (automatic startup)	Time-based invocation
COW	Removal of pending	1SR	Removal of the pending status due to collaterals (automatic startup)	In units of 1 import declaration, etc.	Exist	SER	Security Registration	When individual securities are registered or increased for import declarations, etc. in security shortage
						CTT	Completion of screening of written collateral offers	
COW	Removal of pending	3SR	Removal of the pending status due to collaterals (automatic startup at the office opening time)	In units of 1 import declaration, etc.	Exist	SER	Security Registration	Time-based invocation
						CTT	Completion of screening of written collateral offers	
—	—	MP1	MPN Inquiry	In units of 1 Payment Number	Not exist			When inquiry request messages from the multi-payment network are received

Original Procedure		Accumulative Processing Procedure		Processing Unit	Existence of Process Result Output	Invoked Procedure		Invocation Timing of Accumulative Processing Procedure
—	—	MP2	MPN negation	In units of 1 Payment Number	Not exist			When treasury money clearing request messages from the multi-payment network are received
				In units of 1 declaration, etc.				When the Process Results from the real-time account Web server indicating that "online real-time account withdrawal resulted in normal termination" are received
MP2	MPN negation	3MP	MPN negation (automatic startup at the office opening time)	In units of 1 Payment Number	Not exist			Time-based invocation
—	—	2KZ	Lump-sum deduction from special declaration accounts (batch startup)	In units of 1 collective Payment Number and 1 tab/fee subject	Not exist			Time-based invocation
—	—	RB1	Confirmation of real-time direct debit results	In units of 1 declaration, etc.	Exist (Only for Tonnage Due Payment Declaration)			When the Process Results from the real-time account Web server are received
CEW	Post-carry-in process for export declarations	1CE	Post-carry-in process for export declarations (automatic startup)	In units of 1 export declaration / in units of 1 export declaration of unaccompanied articles	Exist	BIC	Registration of confirmation of carry-in (uncustomed export)	When the entire quantity of cargo, for which export declaration or export declaration of unaccompanied articles has been made before carry-in, is carried in to distributed warehouses, including the warehouse planned for customs clearance
						CYA	Registration of confirmation of CY carry-in	
						VAN	Registration of vanning information (by container)	
						VAE	Registration of vanning information (by export control number)	
						VAA	Addition of vanning information	
						VAD	Correction of vanning information	
CEW	Post-carry-in process for export declarations	3EW	Post-carry-in process for export declarations (automatic startup at the office opening time)	In units of 1 export declaration / in units of 1 export declaration of unaccompanied articles	Exist			Time-based invocation
RP2	Fee Receipt Confirmation	1CP	Completion of screening of application for permission for entrance into and departure from closed port (automatic startup)	In units of 1 application number	Exist			When the Process Results from REPS indicating that the payment of fees has been completed is received
—	—	1AC	Completion of screening of applications for the permission of examination of the cargo in places other than designated areas (automatic startup)	In units of 1 application number	Exist			When the Process Results from REPS indicating that the payment of fees has been completed is received
—	—	1HI	Notifications of general application fee payment numbers (automatic startup)	In units of 1 serial no. of receipt	Exist			When the Process Results from REPS indicating that the payment of fees has been completed is received
—	—	1MT	Output of issuance of automobile customs clearance certificate	In units of 1 serial no. of receipt	Exist			When the Process Results from REPS indicating that the payment of fees has been completed is received
PAI	Registration of permission/approval information (import clearance)	1CH	Completion of screening of general applications (accumulative processing)	In units of 1 general application receipt number	Exist			When the registration of examination completion of General Application is processed with Permission/Application, etc. Information Registration (import clearance)
PAE	Registration of permission/approval information (export clearance)	1CH	Completion of screening of general applications (accumulative processing)	In units of 1 general application receipt number	Exist			When the registration of examination completion of General Application is processed with Permission/Application, etc. Information Registration (export clearance)
IFA	Registration of items on the report concerning the import of foods	1FA	Registration of items on the report concerning the import of foods (Automatic Invocation Processing)	In units of 1 notification number	Exist	SWA	Registration of items on single-window import declarations	When Foods, etc. Import Notification Registration is processed with Single Window Registration of items on import declarations
IFC	Report concerning the import of foods	1FC	Report concerning the import of foods (Automatic Invocation Processing)	In units of 1 notification number	Exist	SWC	Single-window import declarations	When the information on the import declaration made is linked to the information on Foods, etc. Import Notification
IFC	Report concerning the import of foods	3IF	Report concerning the import of foods (fixed time automatic invocation)	In units of 1 notification number	Exist			Time-based invocation
ILC	Applications for the examination of imported livestock products	1IL	Application for Examination of Imported Animal Products (automatic invocation of application after Arrival)	In units of applications	Not exist	PKI	Discharge confirmation registration (blanket registration)	When cargo, for which information indicating that automatic invocation of application after the Arrival of imported animal products is to be made is registered, is discharged or carried in to the warehouse planned for customs clearance
						PKK	Discharge confirmation registration (Separate)	
						CYA	Registration of confirmation of CY carry-in	

Original Procedure		Accumulative Processing Procedure		Processing Unit	Existence of Process Result Output	Invoked Procedure		Invocation Timing of Accumulative Processing Procedure
						CYB	Confirmation of CY carry-in outside the system (by container)	Customs clearance
						CYD	Confirmation of CY carry-in outside the system (by B/L)	
						CYE	Confirmation of CY carry-in outside the system (bulk carry-in)	
						BIB	Confirmation of carry-in outside the system (import cargo)	
						BIA	Carry-in confirmation registration (General Customs Transit cargo)	
						CTS	Registration of confirmation of consolidated cargo	
SIK	Tax amount registration	1SK	Tax amount registration (automatic invocation)	In units of applications	Not exist	RPC	Applications for payment of general application fees	when the application for "International Tourist Tax"
—	—	1COPR	Output of certificate of origin information reports	In units of user / In units of "N-C/O number"	Not exist	IDC	Import declaration	When the application for electronic certificate of origin for import declarations
						1ID	Import declaration (automatic startup of the final declaration)	
						3ID	Import declaration (automatic startup at the office opening time)	
						CEA	Import declaration examination completion	
						CEA01	Completion of screening of import declarations (forced input)	
						COW	Removal of pending	
						1CW01	Removal of the pending status (automatic startup)	
						3CW	Removal of the pending status (automatic startup at the office opening time)	
						1SR	Removal of the pending status due to collaterals (automatic startup)	
						3SR	Removal of the pending status due to collaterals (automatic startup at the office opening time)	
						RCC	Confirmation of receipt	
						RCC20	Confirmation of receipt (forced input)	
						RCC01	Confirmation of receipt (forced input by other stations)	
						RCC30	Confirmation of receipt (bar code reader)	
						RCC40	Confirmation of receipt and registration of receipt notices (bar code reader)	
						GFG	Registration of deducted settlements and losses due to nonpayment	
						GFG20	Registration of deducted settlements and losses due to nonpayment (forced input)	
						MPF	Forced MPN negation	
						MP2	MPN negation	
						3MP	MPN negation (automatic startup at the office opening time)	
						1COPR	Output of certificate of origin information reports	
—	—	1MT	Output of issuance of automobile customs clearance certificate	In units of application for certificate	Exist	MTD	Completion of screening of issuance of automobile customs clearance certificate	when issuance of automobile customs clearance certificate
						MTE	Confirmation of handling fees	
						MTG	Correction of remarks after issuance of automobile customs clearance certificate	

<Air Related Procedures>								
EDC	export declaration	1ED	Export declaration (automatic startup)	In units of 1 export declaration	Exist	BII01	Registration of separate carry-in confirmation	When cargo, for which information indicating that export declaration on carry-in is to be made is registered, is carried in
						BIL01	Registration of bulk carry-in confirmation	
EDC	export declaration	3ED	Export declaration (automatic startup)	In units of 1 export declaration	Exist			Time-based invocation
EAC	Applications for changes to the content of export permission	1EA	Applications for changes to the content of export permission (accumulative processing)	In units of 1 export declaration	Exist	EAM01	Applications for changes to the content of export permission (bulk change of the port of shipment)	—
UEC	Export declarations of unaccompanied articles	1UE	Export declaration of unaccompanied articles (automatic startup)	In units of 1 export declaration of unaccompanied articles	Exist	BII01	Registration of separate carry-in confirmation	When cargo, for which information indicating that export declaration of unaccompanied articles on carry-in is to be made is registered, is carried in
						BIL01	Registration of bulk carry-in confirmation	
UEC	Export declarations of unaccompanied articles	3UE	Export declaration of unaccompanied articles (automatic startup)	In units of 1 export declaration of unaccompanied articles	Exist			Time-based invocation
UAC	Applications for changes to the content of export permission for unaccompanied articles	1UA	Applications for changes to the content of export permission for unaccompanied articles (accumulative processing)	In units of 1 export declaration of unaccompanied articles	Exist	EAM01	Applications for changes to the content of export permission (bulk change of the port of shipment)	—

Original Procedure		Accumulative Processing Procedure		Processing Unit	Existence of Process Result Output	Invoked Procedure		Invocation Timing of Accumulative Processing Procedure
MEC	Export manifest clearance declarations	1ME	Export manifest clearance declarations (automatic startup)	In units of 1 export manifest clearance declaration	Exist	BII01	Registration of separate carry-in confirmation	When cargo, for which information indicating that export manifest clearance declaration on carry-in is to be made is registered, is carried in
						BIL01	Registration of bulk carry-in confirmation	
MEC	Export manifest clearance declarations	3ME	Export manifest clearance declarations (automatic startup)	In units of 1 export manifest clearance declaration	Exist			Time-based invocation
MAF	Applications for changes to the content of permission of export manifest clearance declarations	1MA	Applications for changes to the content of permission of export manifest clearance declarations (accumulative processing)	In units of 1 export manifest clearance declaration	Exist	EAM01	Applications for changes to the content of export permission (bulk change of the port of shipment)	—
CEW	Post-carry-in process for export declarations	1CE	Post-carry-in process for export declarations (automatic startup)	In units of 1 export declaration / in units of 1 export declaration of unaccompanied articles / in units of 1 export manifest clearance declaration	Exist	BII01	Registration of separate carry-in confirmation	When the entire quantity of cargo, for which export declaration of unaccompanied articles or export manifest clearance declaration has been made before carry-in, is carried in
						BIL01	Registration of bulk carry-in confirmation	
CEW	Post-carry-in process for export declarations	3EW	Post-carry-in process for export declarations (automatic startup at the office opening time)	In units of 1 export declaration / in units of 1 export declaration of unaccompanied articles / in units of 1 export manifest clearance declaration	Exist			Time-based invocation
IDC	Import declaration	1ID	Import declaration (automatic startup of the final declaration)	In units of 1 import declaration, etc.	Exist	ACH	Registration of AWB information (import)	When cargo, for which pre-arrival declaration (automatic invocation) concerning import declaration, etc., pre-arrival declaration concerning import declaration on the moment of arrival, or pre-arrival declaration concerning import declaration before cargo arrival is registered, is arrived at the warehouse planned for customs clearance, matched, or carried in, etc. by the procedures
						PKG	Registration of information about cargo confirmation	
						CAW	Correction of AWB information	
						CPK	Correction of information about cargo confirmation	
						HCH01	Registration of HAWB information (import)	
						HPK	Registration of information about consolidated cargo confirmation	
						CHA	Correction of HAWB information	
						CHP	Correction of information about consolidated cargo confirmation	
						OIN	Registration of confirmation of carry-in (bonded transportations not subject to the system)	
						KAM01	Registration of cargo shift information	
						OUT	Registration of confirmation of CY carry-out (general)	
IDC	Import declaration	3ID	Import declaration (automatic startup at the office opening time)	In units of 1 import declaration, etc.	Exist	BIN01	Registration of confirmation of carry-in (bonded transportations subject to the system)	Time-based invocation
						CAI01	Registration of changes to information about import cargo	
IDC	Import declaration	1SW	Single-window import declarations (automatic startup)	In units of 1 import declaration, etc.	Exist	SWC	Single-window import declarations	—
MWC	Import declarations of shipment (carrying out of a comprehensive bonded area) of petroleum products	3MW	Import declarations of shipment (carrying out of a comprehensive bonded area) of petroleum products (automatic startup at the office opening time)	In units of 1 declaration of import from manufacturing warehouse, etc.	Exist			Time-based invocation
CEA	Import declaration examination completion	3CE	Completion of screening of import declarations (automatic startup at the office opening time)	In units of 1 import declaration, etc.	Exist			Time-based invocation
MIC	Import manifest clearance declarations	1MI	Import manifest clearance declarations (automatic startup of the final declaration)	In units of 1 import manifest clearance declaration	Exist	ACH	Registration of AWB information (import)	When cargo, for which pre-arrival declaration (automatic invocation) concerning import manifest clearance declaration, etc. or pre-arrival declaration concerning import declaration on the moment of arrival is registered, is arrived at the warehouse planned for customs
						PKG	Registration of information about cargo confirmation	
						CAW	Correction of AWB information	
						CPK	Correction of information about cargo confirmation	

Original Procedure		Accumulative Processing Procedure		Processing Unit	Existence of Process Result Output	Invoked Procedure		Invocation Timing of Accumulative Processing Procedure
						HCH01	Registration of HAWB information (import)	clearance, matched, or carried in, etc. by the procedures
						HPK	Registration of information about consolidated cargo confirmation	
						CHA	Correction of HAWB information	
						CHP	Correction of information about consolidated cargo confirmation	
						OIN	Registration of confirmation of carry-in (bonded transportations not subject to the system)	
						KAM01	Registration of cargo shift information	
						OUT	Registration of confirmation of CY carry-out (general)	
						BIN01	Registration of confirmation of carry-in (bonded transportations subject to the system)	
						CAI01	Registration of changes to information about import cargo	
MIC	Import manifest clearance declarations	3MI	Import manifest clearance declarations (automatic startup at the office opening time)	In units of 1 import manifest clearance declaration	Exist			Time-based invocation
COW	Removal of pending	3CW	Removal of the pending status (automatic startup at the office opening time)	In units of 1 import declaration, etc.	Not exist	1CW01	Removal of the pending status (automatic startup)	Time-based invocation
COW	Removal of pending	1SR	Removal of the pending status due to collaterals (automatic startup)	In units of 1 import declaration, etc.	Not exist	SER	Security Registration	When individual securities are registered or increased for import declarations, etc. in security shortage
COW	Removal of pending	3SR	Removal of the pending status due to collaterals (automatic startup at the office opening time)	In units of 1 import declaration, etc.	Not exist	SER	Security Registration	Time-based invocation
—	—	1HA01	Automatic startup of final declarations of HAWB cargo 1	In units of 1 MAWB	Not exist	ADM01	Advance Cargo Information Registration	When pre-arrival declaration concerning import declaration on the moment of arrival (in the case where cargo is delivered at a customs airport) or pre-arrival declaration concerning import declaration before cargo arrival is registered for the HAWBs pertaining to the MAWB
						ACH	Registration of AWB information (import)	
						CAW	Correction of AWB information	
						OIN	Registration of confirmation of carry-in (bonded transportations not subject to the system)	
						KAM01	Registration of cargo shift information	
						OUT	Registration of confirmation of CY carry-out (general)	When pre-arrival declaration concerning import declaration on the moment of arrival (in the case where cargo is delivered at a place of collecting air cargo) is registered for the HAWBs pertaining to the MAWB
—	—	1HA02	Automatic startup of final declarations of HAWB cargo 2	In units of 40 HAWBs	Not exist	1HA01	Automatic startup of final declarations of HAWB cargo 1	When pre-arrival declaration concerning import declaration on the moment of arrival or pre-arrival declaration concerning import declaration before cargo arrival is registered for the HAWBs pertaining to the MAWB
—	—	1OL	Customs Transit Declaration (accumulative processing)	In units of 1 AWBs	Not exist	PKG	Registration of information about cargo confirmation	When the PKG ULD procedure for intact cargo is processed for cargo, for which information indicating that automatic invocation of customs transit declaration is to be used is registered by the ULD Delivery Information Registration (UDA) procedure
—	—	MP1	MPN Inquiry	In units of 1 Payment Number	Not exist			When inquiry request messages from the multi-payment network are received
—	—	MP2	MPN negation	In units of 1 Payment Number	Not exist			When treasury money clearing request messages from the multi-payment network are received
				In units of 1 declaration, etc.				When the Process Results from the real-time account Web server indicating that "online real-time account withdrawal resulted in normal termination" are received
MP2	MPN negation	3MP	MPN negation (automatic startup at the office opening time)	In units of 1 Payment Number	Not exist			Time-based invocation
—	—	RB1	Confirmation of real-time direct debit results	In units of 1 declaration, etc.	Not exist			When the Process Results from the real-time account Web server are received
RP2	Fee Receipt Confirmation	1CP	Completion of screening of application for permission for entrance into and departure from closed port (automatic startup)	In units of 1 application number	Exist			When the Process Results from REPS indicating that the payment of fees has been completed is received

Original Procedure		Accumulative Processing Procedure		Processing Unit	Existence of Process Result Output	Invoked Procedure		Invocation Timing of Accumulative Processing Procedure
—	—	1AC	Completion of screening of applications for the permission of examination of the cargo in places other than designated areas (automatic startup)	In units of 1 application number	Exist			When the Process Results from REPS indicating that the payment of fees has been completed is received
—	—	1HI	Notifications of general application fee payment numbers (automatic startup)	In units of 1 serial no. of receipt	Exist			When the Process Results from REPS indicating that the payment of fees has been completed is received
—	—	1MT	Output of issuance of automobile customs clearance certificate	In units of 1 serial no. of receipt	Exist			When the Process Results from REPS indicating that the payment of fees has been completed is received
PAI	Registration of permission/approval information (import clearance)	1CH	Completion of screening of general applications (accumulative processing)	In units of 1 general application receipt number	Exist			When the registration of examination completion of General Application is processed with Permission/Application, etc. Information Registration (import clearance)
PAE	Registration of permission/approval information (export clearance)	1CH	Completion of screening of general applications (accumulative processing)	In units of 1 general application receipt number	Exist			When the registration of examination completion of General Application is processed with Permission/Application, etc. Information Registration (export clearance)
IFA	Registration of items on the report concerning the import of foods	1FA	Registration of items on the report concerning the import of foods (Automatic Invocation Processing)	In units of 1 notification number	Exist	SWA	Registration of items on single-window import declarations	When Foods, etc. Import Notification Registration is processed with Single Window Registration of items on import declarations
IFC	Report concerning the import of foods	1FC	Report concerning the import of foods (Automatic Invocation Processing)	In units of 1 notification number	Exist	SWC	Single-window import declarations	When the information on the import declaration made is linked to the information on Foods, etc. Import Notification
IFC	Report concerning the import of foods	3IF	Report concerning the import of foods (fixed time automatic invocation)	In units of 1 notification number	Exist			Time-based invocation
ILC	Applications for the examination of imported livestock products	1IL	Examination of imported livestock products (Automatic Invocation Processing of post-arrival applications)	In units of applications	Not exist	PKG	Registration of information about cargo confirmation	When cargo, for which information indicating that automatic invocation of application after the Arrival of imported animal products is to be made is registered, is matched or carried in, etc. by the procedure
						CPK	Correction of information about cargo confirmation	
						HPK	Registration of information about consolidated cargo confirmation	
						CHP	Correction of information about consolidated cargo confirmation	
						OIN	Registration of confirmation of carry-in (bonded transportations not subject to the system)	
						ACH	Registration of AWB information (import)	
						CAW	Correction of AWB information	
						HCH01	Registration of HAWB information (import)	
						CHA	Correction of HAWB information	
						CAI01	Registration of changes to information about import cargo	
SIK	Tax amount registration	1SK	Tax amount registration (automatic invocation)	In units of applications	Not exist	RPC	Applications for payment of general application fees	when the application for "International Tourist Tax"
—	—	1COPR	Output of certificate of origin information reports	In units of user / In units of "N-C/O number"	Not exist	IDC	Import declaration	When the application for electronic certificate of origin for import declarations
						1ID	Import declaration (automatic startup of the final declaration)	
						3ID	Import declaration (automatic startup at the office opening time)	
						CEA	Import declaration examination completion	
						CEA01	Completion of screening of import declarations (forced input)	
						COW	Removal of pending	
						1CW01	Removal of the pending status (automatic startup)	
						3CW	Removal of the pending status (automatic startup at the office opening time)	
						1SR	Removal of the pending status due to collaterals (automatic startup)	
						3SR	Removal of the pending status due to collaterals (automatic startup at the office opening time)	
						RCC	Confirmation of receipt	
						RCC20	Confirmation of receipt (forced input)	
						RCC01	Confirmation of receipt (forced input by other stations)	
						RCC30	Confirmation of receipt (bar code reader)	
						RCC40	Confirmation of receipt and registration of receipt notices (bar code reader)	
						GFG	Registration of deducted settlements and losses due to nonpayment	

Original Procedure		Accumulative Processing Procedure		Processing Unit	Existence of Process Result Output	Invoked Procedure		Invocation Timing of Accumulative Processing Procedure
						GFG20	Registration of deducted settlements and losses due to nonpayment (forced input)	
						MPF	Forced MPN negation	
						MP2	MPN negation	
						3MP	MPN negation (automatic startup at the office opening time)	
						1COPR	Output of certificate of origin information reports	
—	—	1MT	Output of issuance of automobile customs clearance certificate	In units of application for certificate	Exist	MTD	Completion of screening of issuance of automobile customs clearance certificate	when issuance of automobile customs clearance certificate
						MTE	Confirmation of handling fees	
						MTG	Correction of remarks after issuance of automobile customs clearance certificate	

Table A7-2 List of Accumulative Processing Procedures (Delayed Procedures) (Automatic Invocation Processing (Pattern 2))

(Note 1) This table describes the processing content, etc. when an "Accumulative Processing" is automatically invoked in place of the "original procedure (As-Needed Report Request Information Registration/Change procedure)".

In delayed processing, target "batch procedure (as-needed processing)" is invoked by processing the "original procedure (As-Needed Report Request Information Registration/Change procedure)", and an accumulative procedure is invoked after completing the "batch procedure (as-needed processing)".

Original Procedure		Accumulative Procedure		Processing Unit	Existence of Process Result Output	Batch Procedure (as-needed processing) (Note 2)		Invocation Timing of Accumulative Procedure
DLI01	Call-up for information about the initial import declaration (import declarations of warehousing cargo release)	1DI01	Call-up for information about the initial import declaration (import declarations of warehousing cargo release) (processing result notification on an as-needed basis) (accumulative processing)	In units of 1 serial no. of receipt	Exist	—	Original Declaration Information Call Up	On completion of as-needed processing
DLI02	Call-up for information about the initial import declaration (corrected declaration)	1DI02	Call-up for information about the initial import declaration (corrected declarations) (processing result notification on an as-needed basis) (accumulative processing)	In units of 1 serial no. of receipt	Exist	—	Original Declaration Information Call Up	On completion of as-needed processing
DLI03	Call-up for information about the initial import declaration (requests for correction of Customs duties, etc.)	1DI03	Call-up for information about the initial import declaration (requests for correction of Customs duties, etc.) (processing result notification on an as-needed basis) (accumulative processing)	In units of 1 serial no. of receipt	Exist	—	Original Declaration Information Call Up	On completion of as-needed processing
DLS03	Registration of request information related to description data for lump-sum payment (for civilian use) and changes to such information	1DS03	Registration of request information related to description data for lump-sum payment (for civilian use) and changes to such information (processing result notification on an as-needed basis)	In units of 1 serial no. of receipt	Exist	I03	Collective Payment Description Information	On completion of as-needed processing
						I04	Collective Payment Description Data	
						I05	Collective Payment Description Summary Data	
DLH01	Registration of re-output request information for bond statistic reports and changes to such information	1DH01	Registration of re-output request information for information about bond statistic reports and changes to such information (processing result notification on an as-needed basis)	In units of 1 serial no. of receipt	Exist	—	Re-Output of Bonded Management Document Information	On completion of as-needed processing
MTB	Call-up for application for issuance of automobile customs clearance certificate	1MB01	Call-up for application for issuance of automobile customs clearance certificate (processing result notification on an as-needed basis) (accumulative processing)	In units of 1 serial no. of receipt	Exist	—	Registration of issuance of automobile customs clearance certificate	On completion of as-needed processing

(Note 2) The Item No. on the left-hand side of each item indicates the Procedure Specification Number of the batch procedure. For DLI01, DLI02, DLI03, DLH01 and MTB, there is no Procedure Specification for as-needed processing because they are not procedures for registering Management Document Information of as-needed processing and are not original procedures. The process name is described in the Procedure Specification of each online procedure.
