
2035. Loading Description Notification

Procedure Code	Procedure Name
LDR	Loading Description Notification

1. Procedure Outline

Report the information (e.g. freight rate) based on the information registered in the "ACL Information Registration (For Container Vessels) (ACL)" procedure or "ACL Information Registration (For Conventional Vessels/Car Carriers)" (hereafter, "ACL Procedure"). This procedure also corrects or cancels the information that was reported.

2. Implementer

Carrier, Shipping Agent, NVOCC

3. Limits

- [1] The maximum number of information items listed for a pre-paid freight rate that can be entered in one procedure is 5.
- [2] The maximum number of information items listed on a Collect freight rate that can be entered in one procedure is 5.
- [3] The maximum number of information items listed on a detailed freight rate that can be entered in one procedure is 20.

4. Input Conditions

(1) Implementer verification

The implementer is a user already registered in the system.

(2) Input field verification

(A) Individual field verification

See "List of Input Fields" and "System Design Specification for NACCS Online Procedures".

(B) Data linkage verification

See "List of Input Fields" and "System Design Specification for NACCS Online Procedures"

5. Processing Details

(1) Input verification

If the above-mentioned input conditions are met, the Process Result Code "00000-0000-0000" should be set before proceeding to the steps that follow.

If the above input conditions are not satisfied, which means an error, output the Process Result Output after setting a code other than "00000-0000-0000" in the Process Result Code. (For error details, see "List of Process Result Codes".)

(2) Output process of output information

Process the output information (described later). For details of output field, see "List of Output Fields".

6. Output Information

Information Name	Output Conditions	Output Destination
Process Result Output	Nil	Implementer
Information on Loading Description Notification	Nil	Entered notification forwarding party
