

Output Information Name (Output Information Code)			ACL Change Information (Goods Description Information) (SAT147)																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																		
Item No.	Column	Field name	Attribute	Length	Repeat 1	Repeat 2	Condition										Code	Output Condition/Format																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																			
							In the case of sending to the implementer or the notification forwarding party			In the case of sending to a booking carrier or NVOCC (*2)																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																											
1		Output Common Field	an	398			M				M																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																										

Output Information Name (Output Information Code)			ACL Change Information (Goods Description Information) (SAT147)																			
Item No.	Column	Field name	Attribute	Length	Repeat 1	Repeat 2	Condition										Code	Output Condition/Format				
							In the case of sending to the implementer or the notification forwarding party			In the case of sending to a booking carrier or NVOCC (*2)												
25	*	Weight Unit Code (Gross)	an	3				M			C							Quantity unit code (UN/ECE Recommendation No.20/Alphabet)	Output [Weight Unit Code (Gross)] registered in the ACL Information DB. KGM: Kilogram TNE: Metric ton LBR: Pound			
26	*	Net Weight	n	10			C				C								Output [Net Weight] registered in the ACL Information DB. ZZZZZ9.999			
27	*	Weight Unit Code (Net)	an	3				M			C							Quantity unit code (UN/ECE Recommendation No.20/alphabet)	Output [Weight Unit Code (Net)] registered in the ACL Information DB. KGM: Kilogram TNE: Metric ton LBR: Pound			
28	*	Gross Measurement	n	10			C				C								Output [Gross Measurement] registered in the ACL Information DB. ZZZZZ9.999			
29	*	Measurement Unit Code (Gross)	an	3				M			C							Quantity unit code (UN/ECE Recommendation No.20/Alphabet)	Output [Measurement Unit Code (Gross)] registered in the ACL Information DB. MTQ: Cubic meter FTQ: Cubic foot BFT: Board foot measure			
30	*	Net Measurement	n	10			C				C								Output [Net Measurement] registered in the ACL Information DB. ZZZZZ9.999			
31	*	Measurement Unit Code (Net)	an	3				M			C							Quantity unit code (UN/ECE Recommendation No.20/Alphabet)	Output [Measurement Unit Code (Net)] registered in the ACL Information DB. MTQ: Cubic meter FTQ: Cubic foot BFT: Board foot measure			
32	*	Length (L)	n	4			C				C								(1) Output a space if the data is output from ACL01 procedure. (2) Output [Length (L)] registered in the ACL Information DB if the data is output from the ACL02 procedure.			
33	*	Width (W)	n	4			C				C								(1) Output a space if the data is output from ACL01 procedure. (2) Output [Width (W)] registered in the ACL Information DB if the data is output from the ACL02 procedure.			
34	*	Height (H)	n	4			C				C								(1) Output a space if the data is output from ACL01 procedure. (2) Output [Height (H)] registered in the ACL Information DB if the data is output from the ACL02 procedure.			
35	*	LWH Description Identifier	an	1			C				C								(1) Output a space if the data is output from ACL01 procedure. (2) Output [LWH Description Identifier] registered in the ACL Information DB if the data is output from the ACL02 procedure.
