No	Column	Field Name	Attribute	Length	Repeat1	Repeat2	Query Type "A"		Query Type "B"		Query Type "C"		Code	Output Condition/Format
		Output Information Name (Output Information Code)					Advance Filing List Reference Information (SAS126)							
1		Output Common Field	an	398			M		M		M			Output the following items on a mail subject. - Vessel Code: 9-digits - Voyage Number: 10-digits - Carrier Code: 4-digits
2		Process Result Code	an	75			M		M		M		Process Result Code	Output a process result code returned by the system.
3		Query Type	an	1			C		M		M			Output entered Query Type.
4		Vessel Code	an	9			C		M		M		Call Sign	Output entered Vessel Code.
5		Voyage Number	an	10			C		M		M			Output entered Voyage Number.
6		Carrier Code	an	4			C		M		M			Output entered Carrier Code.
7		Port of Loading Code	an	5			C		C		C		UN/LOCODE	Output entered Port of Loading Code.
8		Port of Loading Suffix	an	1				C		C		C		Output entered Port of Loading Suffix.
9		Port of Discharge Code	an	5			C		C		C		UN/LOCODE	Output entered Port of Discharge Code.
10		Port of Discharge Suffix	an	1				C		C		C		Output entered Port of Discharge Suffix.
		From No. 11 to No. 23 will be outputted only when the process completed successfully.												
11	100	B/L Number	an	35			M		M		M			Output B/L number (Ocean(Master) B/L or House B/L) registered in Advance Cargo Information DB. (Regarding sorting conditions, please refer to "body_text" of procedure specification.)
12	*	B/L Type Identifier	an	1			M		M		M			Output registered B/L type identifier in Advance Cargo Information DB; M: Master B/L or B/L to which one or more House B/Ls are related. H: House B/L
13	*	B/L Type Discrepancy	an	1			C		C		C			Output registered B/L type discrepancy in Advance Cargo Information DB; *: When inquired B/L was registered in AMR/CMR without 'M' in "Master B/L Identifier", and yet one or more House B/Ls are related to the inquired B/L.
14	*	Master B/L Number	an	35			C		C		C			When the B/L number outputted in the field No. 11 is House B/L number registered in AHR or CHR, output Master B/L number registered in Advance Cargo Information DB.
15	*	Advance Filing Completion Identifier	an	1			C		C		C			Output Advance Filing Completion Identifier registered in Advance Cargo Information DB. Y: Advance Filing has been completed
16	*	Departure Time Registration Completion Identifier	an	1			C		C		C			Output Departure Time Registration Completion Identifier registered in Advance Cargo Information DB. Y: Departure Time Registration has been done
17	*	Discrepancy Identifier (no House B/L)	an	1			C		C		C			When the B/L number outputted in the field No. 11 is other than House B/L, output Discrepancy Identifier (no House B/L) registered in Advance Cargo Information DB. H: AMR or CMR has been done, while AHR or CHR has NOT been done.
18	*	Discrepancy Identifier (no Master B/L)	an	1			C		C		C			When the B/L number outputted in the field No. 11 is other than House B/L, output Discrepancy Identifier (no Master B/L) registered in Advance Cargo Information DB. M: AMR or CMR has NOT been done, while AHR or CHR has been done.
19	*	Discrepancy Identifier (Discrepancy in Vessel Information)	an	1			C		C		C			When the B/L number outputted in the field No. 11 is other than House B/L, output Discrepancy Identifier (Discrepancy in vessel information) registered in Advance Cargo Information DB. S: Discrepancy exists in vessel information between Master B/L and House B/L
20	*	Discrepancy Identifier (Overdue Reporting)	an	1			C		C		C			Output Discrepancy Identifier (Overdue Reporting) registered in Advance Cargo Information DB. T: Overdue Reporting
21	*	Prior Notification Code	an	3			C		C		C			Output Prior Notification Code registered in Advance Cargo Information DB.

No	Column	Field Name	Attribute	Length	Repeat1	Repeat2	Query Type "A"	Query Type "B"	Query Type "C"	Code	Output Condition/Format
22	*	Receiving Identifier of Prior Notification to Relevant B/L	an	1			C	C	C		Output in the following cases; 1. The B/L number outputted in the field No. 11 is Master B/L registered via AMR or CMR, and Prior Notification Code has been registered to its related House B/Ls. 2. The B/L number outputted in the field No. 11 is House B/L registered via AHR or CHR, and Prior Notification Code has been registered to its related Master B/Ls. *: Correspond to one of these cases.
23	*	Under Processing Identifier of Application for Cargo Discharge Permission	an	1			C	C	C		Output Under Processing Identifier of Application for Cargo Discharge Permission (information that Cargo Discharge is still under application for permission) registered in Advance Cargo Information DB. Y:Cargo Discharge Permission has been applied, but has not been permitted yet
24	*	Type of B/L Number Association	an	1			C	C	C		When BLL procedure has been done, output Type of B/L Number Association registered in the Advance Cargo Information DB. 1: Separate 2: Combine 3: Switch
25	*	B/L Number Association Identifier	an	1			M	M	M		When BLL procedure has been done, output the followings; B: Registered as "Original B/L Number" in BLL procedure. A: Registered as "New B/L Number" in BLL procedure. C: Registered as "Original B/L Number still used after Association" in BLL procedure.

Output Information Name (Output Information Code): Advance Filing List Reference Information (SAS126)
