1.3 Relationships between Connection Modes and Data Transmission/receipt Modes

Table 1.3.1 shows the relationships between connection modes and data transmission/receipt modes in NACCS:

Table 1.3.1　Relationship between Connection Modes and Data Transmission/Receipt Modes

Networks Available	Connection Mode		Processing Mode	Access Line (See "Appendix 4")
NACCS Network	Peer-to-peer connection		Interactive processing mode (Interactive)	Dedicated line, fiber optic broadband
	Router connection		Interactive processing mode (Interactive)	Dedicated line, fiber optic broadband
	Gateway connection	SMTP two-way	Interactive processing mode (SMTP two-way)	Dedicated line, fiber optic broadband
		SMTP/POP3	E-mail style processing mode (using gateway computers)	Dedicated line, fiber optic broadband
Internet	netNACCS connection		Interactive processing mode (netNACCS)	Internet connection
	WebNACCS connection		WebNACCS processing mode (for Web browser)	Internet connection
	Gateway connection		Interactive processing mode (ebMS processing mode)	Internet connection
