

Appendix 1. Available Connection Modes and
Processing Modes
(Summary)

Appendix 1. Available Connection Modes and Processing Modes (Summary)

Appendix Table 1-1 Appendix Table 1- shows available connection modes and data processing modes by users in NACCS.

Appendix Table 1-1 Available Connection Modes and Processing Modes (Summary)

Connection mode		Processing mode	Use of packaged software (Note 1)	Type of access line	Retrieval of statistic report	Implementation of other relevant minister's procedures
Peer-to-peer connection		Interactive processing mode (for packaged software)	◎ Interactive	Dedicated line, fiber optical broadband	○	○
Router connection		Interactive processing mode (for packaged software)	◎ Interactive	Dedicated line, fiber optical broadband	○	○
Gateway connection	SMTP two-way	Interactive processing mode (SMTP two-way)	△ E-mail (Note 2)	Dedicated line, fiber optical broadband	×	○
	SMTP / POP3	E-mail style processing mode	△ E-mail (Note 2)	Dedicated line, fiber optical broadband	×	○
	HTTP	For retrieval of management document only	×	Dedicated line, fiber optical broadband	○ (Note 3)	× Not applicable
	ebMS	Interactive processing mode (ebMS processing mode)	×	Internet line	×	×
netNACCS connection		Interactive processing mode (for packaged software)	◎ netNACCS	Internet line	○	○
WebNACCS connection		WebNACCS processing mode	×	Internet line	×	○

(Note 1) Use of Packaged Software: ◎=Required ○=Possible
 △=Possible (but operability is not guaranteed)
 ×=Not possible

(Note 2) Packaged software that can be used on computers connected to gateway computers is that of e-mail style processing mode only.

(See Case 7 of "Appendix 3. Concrete Example of System Configuration")

(Note 3) Management documents can be retrieved by following the sequence given in "6.2 Procedures for Retrieving Management Document Information (Using the Own System)".
