

Appendix 15.2 Processing Result Notification (Common Error) Mapping Table

PAA Standards - Processing Result Notification Information

Item No	PAA Standards			Difference	Processing Result Notification Message				
	Index	Field Name	Superset Field Type / Length		Field name	Conditions	Attribute	length	Output Conditions / Format
1	NACCS Header								
2	5	RootElement							
3	10	Header							
4	20	DocumentFormat							
5	30	DocumentFormatIdentifier	an..14	7	Output Information code	M	an	7	**CCMSG" is specified.
6	35	DocumentFormatDescription	an..70		Date of Message Receipt	M	an	14	The date of message receipt is set.
7					Subject	M	an	46	A processing result code (15 digits) for common error is specified. (*2) In NACCS EDI messages, a field comprises 64 digits.
8					Input Message ID Information	C	an	10	Input Message ID input is specified.
9	50	DocumentType							
10	60	DocumentTypeCode	an..10	5	Procedure Code	M	an	5	

Appendix 15.2 Processing Result Notification (Common Error) Mapping Table

PAA Standards - Processing Result Notification Information

Item No	PAA Standards			Difference	Processing Result Notification Message				
	Index	Field Name	Superset Field Type / Length		Field name	Conditions	Attribute	length	Output Conditions / Format
11	50	DocumentIdentification							
12	90	UniqueReferenceNo	an..23	15	Logical Terminal Name	C	an	6	Indicates the logical terminal name of the output destination
13					Message Type	M	an	1	For the procedure, "R" is specified.
14					Message Destination Control Format	M	an	1	For the procedure, "Q" is specified.
15	130	MessageFunction	an..35	5	RTP Tag	C	an	30	RTP Tag for a message which is not successfully received is specified.
16	160	SenderID	an..35	4	User code	M	an	5	The code of the user who received the relevant message is set.
17					Message Tag Information	C	an	26	Message Tag Information which is input is specified. (This is used to identify a series of processing result messages corresponding to processing request messages)
18		Common part							
19	170	BODY							
20	180	StatusMessage							
21	-	OriginalDoc							
22	-	UniqueReferenceNo			processing result code	M	an	75	

* Hatching indicates Hierarchy Tag.
