

9.2 Processes from Initial Value Setting to the Start of Procedure Processing

The flow of processes from initial value setting to the start of procedure processing is as follows.

- (1) Setting initial values by NACCS Center
- (2) Registering or changing settings online by user
- (3) Start of procedure processing (procedure processing such as IDA and IDC)

Figure 9.2.1 shows the image.

(Note) After the start of procedure processing, settings can be changed, as required, on the "Procedure to Change Settings Online (Uxx procedure)".

Figure 9.2.1 Illustration of Processes from Setting Initial Values to the Start of procedure processing

Procedures and items subject to changing settings online by users are listed in "Appendix 11 List of Items Subject to Changing Settings Online by Users"
