## **4063. Inquiry about Manifest Status**

---

Procedure Code	Procedure Name
IMI (IMIOW)	Inquiry about Manifest Status

1. Procedure Outline

An inquiry is made about the Number of B/Ls, Number of Containers, submission status, discharging status, a list of B/L Numbers, a list of Container Numbers, information on B/Ls, information on containers and Receipt Numbers of Report on Temporary Landing, etc. of the Cargo Manifest for each vessel (for each Vessel Code, Port of Discharge, Port of Discharge Suffix).

Inquiry type	Inquiry name	Outline
A	Overview Inquiry	An inquiry is made about submission status discharged status, Number of B/Ls, Number of Containers etc. of the Cargo Manifest in the unit of Carrier. Inquiry in the unit of CY is also made.
B	B/L Number List Inquiry	An inquiry is made about the list of B/L Numbers for the vessel.
C	Container Number List Inquiry	An inquiry is made about the list of Container Numbers for the vessel.
D	Cargo Manifest Information Inquiry	All the Cargo Manifest Information for the vessel is output by means of continuous inquiries.
E	Undischarged Container List Inquiry	An inquiry is made about the list of undischarged Container Numbers.
F	B/L Inquiry	An inquiry is made about the Cargo Manifest numbers for the specified B/L Numbers.
G	Inquiry for Major B/L Item List	An inquiry is made about the major items of Cargo Manifest information for the B/L Numbers for the vessel.
H	Inquiry for Major Container Item List	An inquiry is made about the major items of Cargo Manifest information for the Container Number in relation to the vessel.
K	Inquiry for the List of B/L Numbers(Temporary Landing)	An inquiry is made about the list of B/L Numbers of the temporary landing for the vessel.
T	Inquiry for the List of B/L Numbers(General Customs Transit)	An inquiry is made about the list of B/L Numbers for which registration of General Customs Transit Approval Number is completed for the vessel.
R	Inquiry for the List of B/L Numbers (Prior Notification)	An inquiry is made about the list of B/L Numbers for which Prior Notification of Risk Assessment Result in relation to the vessel <sup>*1</sup> has been registered.
S	Inquiry for the List of B/L Numbers (Discrepancy Information of Advance Filing)	An inquiry is made about the list of B/L Numbers for which Discrepancy Information of Advance Filing in relation to the vessel (Incomplete Advance Filing, Incomplete Departure Time Registration) has been registered.

(\*1) The Prior Notification of Risk Assessment Result consists of following notice codes.

- [1] HLD
- [2] DNL
- [3] DNU
- [4] SPD

2. Implementer

Customs, Carrier, Shipping Agent, CY

3. Limits

Nil

#### 4. Input Conditions

##### (1) Implementer verification

- [1] The implementer is a user already registered in the system.
- [2] If the implementer is a Carrier, the implementer and the user performing the "Manifest Information Registration (MFR)" procedure are the same or the implementer and the Carrier registered by the MFR procedure are the same.
- [3] If the implementer is a Shipping Agent, the implementer and the user performing the MFR procedure are the same, or the consignment relationship with the carrier using the vessel must be registered in the system at the port of discharge entered.
- [4] If the implementer is CY, the implementer and the CY performing the discharge operation specified by the MFR procedure are the same.

##### (2) Input field verification

###### (A) Individual field verification

See "List of Input Fields" and "System Design Specification for NACCS Online Procedures".

###### (B) Data linkage verification

See "List of Input Fields" and "System Design Specification for NACCS Online Procedures".

##### (3) Manifest Management DB verification

- [1] The Manifest Management DB for "the entered Vessel Code + Port of Discharge Code + Port of Discharge Suffix" exist.
- [2] If the Carrier Code is entered, the Carrier Code entered is registered.
- [3] If the implementer is a Carrier, and if no Carrier Code is entered, the Carrier Code of the implementer is registered.
- [4] If the implementer is a Carrier and an inquiry is made about an overview, if conditions [3] and [4] are not satisfied, the vessel operator for the Vessel Code entered and the Carrier of the implementer are the same.
- [5] If a Container Operator Code is entered, the Container Operator Code entered is registered.

##### (4) Cargo Information DB verification

- (A) An inquiry is made about the list of B/L Numbers, list of major B/L items, list of B/L Numbers (temporary landing), list of B/L Number (general Customs Transit), list of B/L Numbers (Prior Notification) or the list of B/L Numbers (Discrepancy Information of Advance Filing).  
The Cargo Information DB satisfying the following conditions exists.

- [1] "Entered Vessel Code + Port of Discharge Code + Port of Discharge Suffix" are registered.
- [2] If the implementer is a Carrier, the Carrier is registered.
- [3] If the implementer is a Shipping Agent, the Carrier Code entered is registered.
- [4] If the implementer is a CY, the CY is registered.
- [5] If the implementer is a CY or the Customs, and if the Carrier Code is entered, the Carrier Code entered is registered.
- [6] If an inquiry is made about a list of B/L Numbers (temporary landing), the temporary landing cargo is registered.

- [7] If an inquiry is made about a list of B/L Numbers (general Customs Transit), the General Customs Transit Approval Number is registered by the MFR procedure, etc.
- [8] If an inquiry is made about a list of B/L Numbers (Prior Notification), a Prior Notification is registered.
- [9] If an inquiry is made about a list of B/L Numbers (Discrepancy Information of Advance Filing), the "Discrepancy Information of Advance Filing (Advance filing implementation, Departure time registration implementation)" is registered.

(B) Cargo Manifest Information Inquiry

The Cargo Information DB satisfying the following conditions exists.

- [1] "Entered Vessel Code + Port of Discharge Code + Port of Discharge Suffix" are registered.
- [2] If the implementer is a Carrier, the Carrier is registered.
- [3] If the implementer is a Shipping Agent, the Shipping Agent is registered, or the consignment relationship with the carrier using the vessel is registered in the system.
- [4] If the implementer is a CY, the CY is registered.
- [5] If the implementer being a Shipping Agent, CY or the Customs, and if the Carrier Code is entered, the Carrier Code entered is registered.
- [6] If the implementer is the Customs and if the Container Operator Code is entered, the Container Operator Code entered is registered.

(C) Inquiry for a B/L

- [1] The Cargo Information DB for the input B/L Number exists.
- [2] "Entered Vessel Code + Port of Discharge Code + Port of Discharge Suffix" are registered.
- [3] If the implementer is a Carrier, the Carrier is registered.
- [4] If the implementer is a Shipping Agent, the Shipping Agent is registered, or the consignment relationship with the carrier using the vessel is registered in the system.
- [5] If the implementer is a CY, the CY is registered.
- [6] If the implementer being a CY or the Customs, and if the Carrier Code is entered, the Carrier Code entered is registered.

(5) Container Information DB verification

- (A) In the case of an inquiry about a list of Container Numbers, a list of undischarged containers or the list of the major container items

The Container Information DB satisfying the following conditions exists.

- [1] "Entered Vessel Code + Port of Discharge Code + Port of Discharge Suffix" are registered.
- [2] If the implementer is a Carrier, the Carrier is registered.
- [3] If the implementer is a Shipping Agent, the Carrier Code entered is registered.
- [4] If the implementer is a CY, the CY is registered.
- [5] If the implementer is a CY or the Customs, and if the Carrier Code is entered, the Carrier Code entered is registered.
- [6] If an inquiry is made about an undischarged container list, the discharge operation is not done.

(B) Cargo Manifest Information inquiry

The Container Information DB satisfying the following conditions exists.

- [1] "Entered Vessel Code + Port of Discharge Code + Port of Discharge Suffix" are registered.
- [2] If the implementer is a Carrier, the Carrier is registered.
- [3] If the implementer is a Shipping Agent, the Shipping Agent is registered, or the consignment relationship with the carrier using the vessel is registered in the system.
- [4] If the implementer is a CY, the CY is registered.
- [5] If the implementer is a Shipping Agent, a CY or the Customs, and if the Carrier Code is entered, the input Carrier Code is registered.
- [6] If the implementer is the Customs where there the Container Operator Code is entered, the Container Operator Code entered is registered.

## 5. Processing Details

### (1) Input verification

If the above-mentioned input conditions are met, the Process Result Code "00000-0000-0000" should be set before proceeding to the steps that follow.

If the above input conditions are not satisfied, which means an error, output the Process Result Output after setting a code other than "00000-0000-0000" in the Process Result Code. (For error details, see "List of Process Result Codes".)

### (2) Edit/output process of the Inquiry about Manifest Status information (inquiry for overview)

If an inquiry is made about an overview, edit and output the Inquiry about Manifest Status information (inquiry for an overview) from the Manifest Management DB. For details on the output fields, see "List of Output Fields".

### (3) Edit/output process of the Inquiry about Manifest Status information (B/L Number list)

If an inquiry is made about a list of B/L Numbers, edit and output the Cargo Manifest status inquiry information (B/L Number list) from the Manifest Management DB and the Cargo Information DB matching the conditions shown in 4. (4). (A) above. For details on the output fields, see "List of Output Fields".

### (4) Edit/output process of the Inquiry about Manifest Status information (Container Number list)

If an inquiry is made about the list of Container Numbers, edit and output the Inquiry about Manifest Status information (Container Number list) from the Manifest Management DB and the Container Information DB matching the conditions shown in 4. (5). (A) above.

### (5) Edit/output process of the Inquiry about Manifest Status information (Cargo Manifest information)

If an inquiry is made about a list of Cargo Manifest information, edit and output the Inquiry about Manifest Status information (Cargo Manifest information) from the Manifest Management DB, Cargo Information DB matching the conditions shown in 4. (4). (B) above and the Container Information DB matching the conditions in 4. (5). (B) above. For details on the output fields, see "List of Output Fields".

### (6) Edit/output process of the Inquiry about Manifest Status information (undischarged container list)

If an inquiry is made about a list of undischarged containers, edit and output the Inquiry about Manifest Status information (undischarged container list) from the Manifest Management DB and the Container Information DB matching the conditions shown in 4. (5). (A) above. For details on the output fields, see "List of Output Fields".

- (7) Edit/output process of the Inquiry about Manifest Status information (inquiry for B/L)

The following processes are performed for a B/L inquiry.

[1] From the Manifest Management DB and the Cargo Information DB, edit and output the Inquiry about Manifest Status information (inquiry for B/L).

[2] If the cargo is container cargo, edit and output the Cargo Manifest status inquiry information (inquiry for a B/L) from the Container Information DB for the Container Number registered in the Cargo Information DB. For details on the output fields, see "List of Output Fields".

- (8) Edit/output process of the Inquiry about Manifest Status information (major item list of B/L)

If an inquiry is made about a list of the major B/L items, edit and output the Inquiry about Manifest Status information (major B/L item list) from the Manifest Management DB and the Cargo Information DB matching the conditions shown in 4. (4). (A) above. For details on the output fields, see "List of Output Fields".

- (9) Edit/output process of the Inquiry about Manifest Status information (major container item list)

If an inquiry is made about a list of major container items, edit and output the Inquiry about Manifest Status information (major container item list) from the Manifest Management DB and the Container Information DB matching the conditions shown in 4. (5). (A) above. For details on the output fields, see "List of Output Fields".

- (10) Edit/output process of the Inquiry about Manifest Status information (B/L Number list (temporary landing))

If an inquiry is made about a list of B/L Numbers (temporary landing), edit and output the Inquiry about Manifest Status information (B/L Number list (temporary landing)) from the Manifest Management DB and the Cargo Information DB matching the conditions shown in 4. (4). (A) above. For details on the output fields, see "List of Output Fields".

- (11) Edit/output process of the Inquiry about Manifest Status information (B/L Number list (general Customs Transit))

If an inquiry is made about a list of B/L Numbers (general Customs Transit), edit and output the Inquiry about Manifest Status information (B/L Number list (general Customs Transit)) from the Manifest Management DB and the Cargo Information DB matching the conditions shown in 4. (4). (A) above. For details on the output fields, see "List of Output Fields".

- (12) Edit/output process of the Inquiry about Manifest Status information (B/L Number list (Prior Notification))

If an inquiry is made about a list of B/L Numbers (Prior Notification), edit and output the Inquiry about Manifest Status information (B/L Number list (Prior Notification)) from the Cargo Information DB matching the conditions of 4. (4). (A) above. For details on the output fields, see "List of Output Fields".

- (13) Edit/output process of the Inquiry about Manifest Status information (B/L Number list (Discrepancy Information of Advance Filing))

If an inquiry is made about a list of B/L Numbers (Discrepancy Information of Advance Filing), edit and output the Cargo Manifest status numbers information (B/L Number list (Discrepancy Information of Advance Filing)) from the Cargo Information DB matching the conditions of 4. (4). (A) above. For details on the output fields, see "List of Output Fields".

- (14) Output process of warning message

If an inquiry is made about a list of B/L Numbers, list of Container Numbers, Cargo Manifest

information, list of undischarged containers, list of major B/L items, list of major container items, list of B/L Numbers (temporary landing), list of B/L Numbers (general Customs Transit), list of B/L Numbers (Prior Notification), and list of B/L Numbers (Discrepancy Information of Advance Filing), and if the information for the inquiry exists in addition to the output information, a warning message is output to the Inquiry about Manifest Status information (inquiry for an overview), etc.

6. Output Information

Information Name	Output Conditions	Output Destination
Inquiry about Manifest Status Information (Overview Inquiry)	Output the information any of the following conditions are satisfied: (1) Query Type "A" (2) An error occurs.	Implementer
Inquiry about Manifest Status Information (B/L Number List)	Query Type "B"	Implementer
Inquiry about Manifest Status Information (Container Number List)	Query Type "C"	Implementer
Inquiry about Manifest Status Information (Cargo Manifest Information)	Query Type "D"	Implementer
Inquiry about Manifest Status Information (Undischarged Container List)	Query Type "E"	Implementer
Inquiry about Manifest Status Information (B/L Inquiry)	Query Type "F"	Implementer
Inquiry about Manifest Status Information (List of Major B/L Items)	Query Type "G"	Implementer
Inquiry about Manifest Status Information (List of Major Container Items)	Query Type "H"	Implementer
Inquiry about Manifest Status Information (B/L Number List (Temporary Landing))	Query Type "K"	Implementer
Inquiry about Manifest Status Information (B/L Number List (General Customs Transit))	Query Type "T"	Implementer
Inquiry about Manifest Status Information (B/L Number List (Prior Notification))	Query Type "R"	Implementer
Inquiry about Manifest Status Information (B/L Number List (Discrepancy Information of Advance Filing))	Query Type "S"	Implementer

## 7. Special Notes

### (1) Note for the temporary landing vacant container

When MFR procedure or addition by "Update Manifest Information (After the Manifest Submission procedure) (CMF02)" procedure for the next port has been done before "Loading Confirmation Registration (CCL)" procedure for the previous port is performed, the container information entered in MFR procedure or CMF02 procedure will be registered in "Next Port Information for Temporary Landing Empty Container" DB.

In this case, switching of container information DB from the previous port information to the next port information will be made as a result of CCL procedure for the previous port or "Discharge Confirmation Registration (individual) (PKK)" procedure/ "Discharge Confirmation Registration (blanket registration) (PKI)" procedure for the next port. Therefore if IMI procedure is done before these procedures are performed, container information for the previous port will be extracted and queried.
