

Table A7-2 List of Accumulative Processing Procedures (Automatic Invocation Processing (Pattern 2))

(Note) This table describes the processing content, etc. when an "Accumulative Processing procedure" is automatically invoked in place of the "original procedure".

Original Procedure		Accumulative Processing Procedure		Processing Unit	Existence of Process Result Output	Invoked Procedure		Invocation Timing of Accumulative Processing Procedure
<Sea Related Procedures>								
EDC	export declaration	1ED	Export declaration (automatic startup)	In units of 1 export declaration	Exist	BIC	Registration of confirmation of carry-in (uncustomed export)	When the entire quantity of cargo, for which information indicating that export declaration on carry-in is to be made is registered, is carried in to distributed warehouses, including the warehouse planned for customs clearance
						CYA	Registration of confirmation of CY carry-in	
						VAN	Registration of vanning information (by container)	
						VAE	Registration of vanning information (by export control number)	
						VAA	Addition of vanning information	
						VAD	Correction of vanning information	
EDC	export declaration	3ED	Export declaration (automatic startup)	In units of 1 export declaration	Exist		Time-based invocation	
UEC	Export declarations of unaccompanied articles	1UE	Export declaration of unaccompanied articles (automatic startup)	In units of 1 export declaration of unaccompanied articles	Exist	BIC	Registration of confirmation of carry-in (uncustomed export)	When the entire quantity of cargo, for which information indicating that export declaration of unaccompanied articles on carry-in is to be made is registered, is carried in to distributed warehouses, including the warehouse planned for customs clearance
						CYA	Registration of confirmation of CY carry-in	
						VAN	Registration of vanning information (by container)	
						VAE	Registration of vanning information (by export control number)	
						VAA	Addition of vanning information	
						VAD	Correction of vanning information	
UEC	Export declarations of unaccompanied articles	3UE	Export declaration of unaccompanied articles (automatic startup)	In units of 1 export declaration of unaccompanied articles	Exist		Time-based invocation	
DCL02	Discharge Container Information Registration (submission)	1DC	Discharge Container Information Registration (accumulative processing)	In units of 1 Carrier	Exist	PID	Arrival Date Registration	When information indicating that automatic invocation on the moment of Arrival is to be made and arrival confirmation is completed, or when information indicating that Discharged Container Information Registration is to be made with Discharge Confirmation Registration (collective registration) procedure and that the registration is to be made during office operating hours is registered
						PKI	Discharge confirmation registration (blanket registration)	
DCL02	Discharge Container Information Registration (submission)	3DC	Discharge Container Information Registration (automatic startup at the office opening time)	In units of 1 Carrier	Not exist			Time-based invocation
OLC/ OLC20	Customs Transit Declaration	1OT	Customs Transit Declaration (automatic startup upon carry-in)	In units of 1 B/L Number * It can be made in units of multiple B/L Nos. on carry-in	Exist	PKK	Discharge confirmation registration (Separate)	When cargo, for which information indicating that customs transit declaration on carry-in is to be made is registered, is discharged or carried in to the departure location
						PKI	Discharge confirmation registration (blanket registration)	
						BIA	Carry-in confirmation registration (General Customs Transit cargo)	
						CTS	Registration of confirmation of consolidated cargo	
						CYE	Confirmation of CY carry-in outside the system (bulk carry-in)	
						CYA	Registration of confirmation of CY carry-in	
						VAN	Registration of vanning information (by container)	
						VAE	Registration of vanning information (by export control number)	
						VAA	Addition of vanning information	
						VAD	Correction of vanning information	

Original Procedure		Accumulative Processing Procedure		Processing Unit	Existence of Process Result Output	Invoked Procedure		Invocation Timing of Accumulative Processing Procedure
OLC/ OLC20	Customs Transit Declaration	3OT	Customs Transit Declaration (automatic startup at the office opening time)	In units of 1 customs transit declaration	Exist			Time-based invocation
IDC	Import declaration	1DA	Import declaration (automatic startup upon carry-in)	In units of 1 import declaration, etc.	Exist	PKK	Discharge confirmation registration(Separate)	When cargo, for which information indicating that import declaration on carry-in, etc. is to be made is registered, is discharged or carried in to the warehouse planned for customs clearance
						PKI	Discharge confirmation registration (blanket registration)	
						BIA	Carry-in confirmation registration (General Customs Transit cargo)	
						CTS	Registration of confirmation of consolidated cargo	
						CYA	Registration of confirmation of CY carry-in	
IDC	Import declaration	1ID	Import declaration (automatic startup of the final declaration)	In units of 1 import declaration, etc.	Exist	PKK	Discharge confirmation registration(Separate)	When cargo, for which information indicating that pre-arrival import declaration (automatic invocation on carry-in) is to be made is registered, is discharged or carried in to the warehouse planned for customs clearance
						PKI	Discharge confirmation registration (blanket registration)	
						BIA	Carry-in confirmation registration (General Customs Transit cargo)	
						BIB	Confirmation of carry-in outside the system (import cargo)	
						CYA	Registration of confirmation of CY carry-in	
						CTS	Registration of confirmation of consolidated cargo	
						CYB	Confirmation of CY carry-in outside the system (by container)	
						CYD	Confirmation of CY carry-in outside the system (by B/L)	
						CYE	Confirmation of CY carry-in outside the system (bulk carry-in)	
						PID	Arrival Date Registration	
						DMF	Manifest Submission	
						CMF02	Update Manifest Information (After the Manifest Submission procedure)	
						CMF03	Update Manifest Information (Adding Information on Next Port of Discharge)	
						NVC01	House B/L Cargo Information Registration	
NVC02	House B/L Cargo Information Registration (association)							
IDC	Import declaration	3ID	Import declaration (automatic startup at the office opening time)	In units of 1 import declaration, etc.	Exist			Time-based invocation
IDC	Import declaration	1SW	Single-window import declarations (automatic startup)	In units of 1 import declaration, etc.	Exist	SWC	Single-window import declarations	—
MWC	Import declarations of shipment (carrying out of a comprehensive bonded area) of petroleum products	3MW	Import declarations of shipment (carrying out of a comprehensive bonded area) of petroleum products (automatic startup at the office opening time)	In units of 1 declaration of import from manufacturing warehouse, etc.	Exist			Time-based invocation
CEA	Import declaration examination completion	3CE	Completion of screening of import declarations (automatic startup at the office opening time)	In units of 1 import declaration, etc.	Exist			Time-based invocation
SDC	Simplified import declaration of sea cargo	1SD	Simplified import declaration of sea cargo (automatic invocation of formal declaration)	In units of 1 sea simplified import declaration	Exist	BIA	Carry-in confirmation registration (General Customs Transit cargo)	If cargo for which a preliminary declaration (automatic invocation of formal declaration) related to a sea simplified import declaration, etc. has been registered, the cargo is carried in to the warehouse planned for customs clearance as a result of the relevant business
						CTS	Registration of confirmation of consolidated cargo	
SDC	Simplified import declaration of sea cargo	3SD	Simplified import declaration of sea cargo (automatic invocation during office operating hours)	In units of 1 sea simplified import declaration	Exist			Time-based invocation

Original Procedure		Accumulative Processing Procedure		Processing Unit	Existence of Process Result Output	Invoked Procedure		Invocation Timing of Accumulative Processing Procedure
COW	Removal of pending	1CW01	Removal of the pending status (automatic startup)	In units of 1 import declaration, etc.	Not exist			When other relevant ministries' procedures laws and ordinances are certified by the system, and when permission/approval of the import declarations, etc. is pending due to waiting for procedures of other laws and ordinances and then the procedures of other laws and ordinances are approved, etc. by procedures related to procedures of relevant ministries and agencies
COW	Removal of pending	3CW	Removal of the pending status (automatic startup at the office opening time)	In units of 1 import declaration, etc.	Not exist	1CW01	Removal of the pending status (automatic startup)	Time-based invocation
COW	Removal of pending	1SR	Removal of the pending status due to collaterals (automatic startup)	In units of 1 import declaration, etc.	Exist	SER	Security Registration	When individual securities are registered or increased for import declarations, etc. in security shortage
						CTT	Completion of screening of written collateral offers	
COW	Removal of pending	3SR	Removal of the pending status due to collaterals (automatic startup at the office opening time)	In units of 1 import declaration, etc.	Exist	SER	Security Registration	Time-based invocation
						CTT	Completion of screening of written collateral offers	
—	—	MP1	MPN Inquiry	In units of 1 Payment Number	Not exist			When inquiry request messages from the multi-payment network are received
—	—	MP2	MPN negation	In units of 1 Payment Number	Not exist			When treasury money clearing request messages from the multi-payment network are received
				In units of 1 declaration, etc.				When the Process Results from the real-time account Web server indicating that "online real-time account withdrawal resulted in normal termination" are received
MP2	MPN negation	3MP	MPN negation (automatic startup at the office opening time)	In units of 1 Payment Number	Not exist			Time-based invocation
—	—	2KZ	Lump-sum deduction from special declaration accounts (batch startup)	In units of 1 collective Payment Number and 1 tab/fee subject	Not exist			Time-based invocation
—	—	RB1	Confirmation of real-time direct debit results	In units of 1 declaration, etc.	Exist (Only for Tonnage Due Payment Declaration)			When the Process Results from the real-time account Web server are received
CEW		1CE	Post-carry-in process for export declarations (automatic startup)	In units of 1 export declaration / in units of 1 export declaration of unaccompanied articles	Exist	BIC	Registration of confirmation of carry-in (uncustomed export)	When the entire quantity of cargo, for which export declaration or export declaration of unaccompanied articles has been made before carry-in, is carried in to distributed warehouses, including the warehouse planned for customs clearance
						CYA	Registration of confirmation of CY carry-in	
						VAN	Registration of vanning information (by container)	
						VAE	Registration of vanning information (by export control number)	
						VAA	Addition of vanning information	
						VAD	Correction of vanning information	
CEW	Post-carry-in process for export declarations	3EW	Post-carry-in process for export declarations (automatic startup at the office opening time)	In units of 1 export declaration / in units of 1 export declaration of unaccompanied articles	Exist			Time-based invocation
RP2 CPZ	Fee Receipt Confirmation Completion of screening of application for permission for entrance into and departure from closed port	1CP	Completion of screening of application for permission for entrance into and departure from closed port (automatic startup)	In units of 1 application number	Exist	RP2	Fee Receipt Confirmation	When the Process Results from REPS indicating that the payment of fees has been completed is received When granting permission for Application for permission for entrance into and departure from closed port
						RPF	Forced negation of fees	
ACE	Completion of screening of applications for the permission of examination of the cargo in	1AC	Completion of screening of applications for the permission of examination of the cargo in places other than designated	In units of 1 application number	Exist	RP2	Fee Receipt Confirmation	When the Process Results from REPS indicating that the payment of fees has been completed is received When granting permission for Applications for the permission of examination of the cargo in places

Original Procedure	Accumulative Processing Procedure	Processing Unit	Existence of Process Result Output	Invoked Procedure	Invocation Timing of Accumulative Processing Procedure
places other than designated areas	areas (automatic startup)			RPF : Forced negation of fees	other than designated areas
HIG : Notifications of general application fee payment numbers	1HI : Notifications of general application fee payment numbers (automatic startup)	In units of 1 serial no. of receipt	Exist	RP2 : Fee Receipt Confirmation	When the Process Results from REPS indicating that the payment of fees has been completed is received When granting permission for Applications for payment of general application fees
				RPF : Forced negation of fees	
	4MT : Output of issuance of automobile customs clearance certificate	In units of 1 serial no. of receipt	Exist		When the Process Results from REPS indicating that the payment of fees has been completed is received
RP2 : Fee Receipt Confirmation	3RS : Fee Receipt Confirmation (automatic startup at the office opening time)	In units of 1 Payment Numbers (fee)	Exist		Time-based invocation
PAI : Registration of permission/approval information (import clearance)	1CH : Completion of screening of general applications (accumulative processing)	In units of 1 general application receipt number	Exist		When the registration of examination completion of General Application is processed with Permission/Application, etc. Information Registration (import clearance)
PAE : Registration of permission/approval information (export clearance)	1CH : Completion of screening of general applications (accumulative processing)	In units of 1 general application receipt number	Exist		When the registration of examination completion of General Application is processed with Permission/Application, etc. Information Registration (export clearance)
IFA : Registration of items on the report concerning the import of foods	1FA : Registration of items on the report concerning the import of foods (Automatic Invocation Processing)	In units of 1 notification number	Exist	SWA : Registration of items on single-window import declarations	When Foods, etc. Import Notification Registration is processed with Single Window Registration of items on import declarations
IFC : Report concerning the import of foods	1FC : Report concerning the import of foods (Automatic Invocation Processing)	In units of 1 notification number	Exist	SWC : Single-window import declarations	When the information on the import declaration made is linked to the information on Foods, etc. Import Notification
IFC : Report concerning the import of foods	3IF : Report concerning the import of foods (fixed time automatic invocation)	In units of 1 notification number	Exist		Time-based invocation
ILC : Applications for the examination of imported livestock products	1IL : Application for Examination of Imported Animal Products (automatic invocation of application after Arrival)	In units of applications	Not exist	PKI : Discharge confirmation registration (blanket registration)	When cargo, for which information indicating that automatic invocation of application after the Arrival of imported animal products is to be made is registered, is discharged or carried in to the warehouse planned for customs clearance
				PKK : Discharge confirmation registration (Separate)	
				CYA : Registration of confirmation of CY carry-in	
				CYB : Confirmation of CY carry-in outside the system (by container)	
				CYD : Confirmation of CY carry-in outside the system (by B/L)	
				CYE : Confirmation of CY carry-in outside the system (bulk carry-in)	
				BIB : Confirmation of carry-in outside the system (import cargo)	
				BIA : Carry-in confirmation registration (General Customs Transit cargo)	
CTS : Registration of confirmation of consolidated cargo					
SIK : Tax amount registration	1SK : Tax amount registration (automatic invocation)	In units of applications	Not exist	RPC : Applications for payment of general application fees	when the application for "International Tourist Tax"
	1COPR : Output of certificate of origin information reports	In units of user / In units of "N-C/O number"	Not exist	IDC : Import declaration	When the application for electronic certificate of origin for import declarations
				1ID : Import declaration (automatic startup of the final declaration)	
				3ID : Import declaration (automatic startup at the office opening time)	
				CEA : Import declaration examination completion	

Original Procedure	Accumulative Processing Procedure	Processing Unit	Existence of Process Result Output	Invoked Procedure	Invocation Timing of Accumulative Processing Procedure		
				CEA01 : Completion of screening of import declarations (forced input) COW : Removal of pending 1CW01 : Removal of the pending status (automatic startup) 3CW : Removal of the pending status (automatic startup at the office opening time) 1SR : Removal of the pending status due to collaterals (automatic startup) 3SR : Removal of the pending status due to collaterals (automatic startup at the office opening time) RCC : Confirmation of receipt RCC20 : Confirmation of receipt (forced input) RCC01 : Confirmation of receipt (forced input by other stations) RCC30 : Confirmation of receipt (bar code reader) RCC40 : Confirmation of receipt and registration of receipt notices (bar code reader) GFG : Registration of deducted settlements and losses due to nonpayment (forced input) GFG20 : Registration of deducted settlements and losses due to nonpayment (forced input) MPF : Forced MPN negation MP2 : MPN negation 3MP : MPN negation (automatic startup at the office opening time) 1COPR : Output of certificate of origin information reports			
-	-	1MT	Output of issuance of automobile customs clearance certificate	In units of application for certificate	Exist	MTD : Completion of screening of issuance of automobile customs clearance certificate MTE : Confirmation of handling fees MTG : Correction of remarks after issuance of automobile customs clearance certificate RP2 : Fee Receipt Confirmation 3RS : Fee Receipt Confirmation (automatic startup at the office opening time) RPF : Forced negation of fees	when issuance of automobile customs clearance certificate
MTC	Application for issuance of automobile customs clearance certificate	3MC	Application for issuance of automobile customs clearance certificate (automatic startup at the office opening time)	In units of application for certificate	Exist		Time-based invocation

<Air Related Procedures>							
EDC	export declaration	1ED	Export declaration (automatic startup)	In units of 1 export declaration	Exist	BII01 : Registration of separate carry-in confirmation BIL01 : Registration of bulk carry-in confirmation	When cargo, for which information indicating that export declaration on carry-in is to be made is registered, is carried in
EDC	export declaration	3ED	Export declaration (automatic startup)	In units of 1 export declaration	Exist		Time-based invocation
EAC	Applications for changes to the content of export permission	1EA	Applications for changes to the content of export permission (accumulative processing)	In units of 1 export declaration	Exist	EAM01 : Applications for changes to the content of export permission (bulk change of the port of shipment)	-
UEC	Export declarations of unaccompanied articles	1UE	Export declaration of unaccompanied articles (automatic startup)	In units of 1 export declaration of unaccompanied articles	Exist	BII01 : Registration of separate carry-in confirmation BIL01 : Registration of bulk carry-in confirmation	When cargo, for which information indicating that export declaration of unaccompanied articles on carry-in is to be made is registered, is carried in
UEC	Export declarations of unaccompanied articles	3UE	Export declaration of unaccompanied articles (automatic startup)	In units of 1 export declaration of unaccompanied articles	Exist		Time-based invocation
UAC	Applications for changes to the content of export permission for unaccompanied articles	1UA	Applications for changes to the content of export permission for unaccompanied articles (accumulative processing)	In units of 1 export declaration of unaccompanied articles	Exist	EAM01 : Applications for changes to the content of export permission (bulk change of the port of shipment)	-

Original Procedure		Accumulative Processing Procedure		Processing Unit	Existence of Process Result Output	Invoked Procedure		Invocation Timing of Accumulative Processing Procedure
MEC	Export manifest clearance declarations	1ME	Export manifest clearance declarations (automatic startup)	In units of 1 export manifest clearance declaration	Exist	BII01	Registration of separate carry-in confirmation	When cargo, for which information indicating that export manifest clearance declaration on carry-in is to be made is registered, is carried in
						BIL01	Registration of bulk carry-in confirmation	
MEC	Export manifest clearance declarations	3ME	Export manifest clearance declarations (automatic startup)	In units of 1 export manifest clearance declaration	Exist			Time-based invocation
MAF	Applications for changes to the content of permission of export manifest clearance declarations	1MA	Applications for changes to the content of permission of export manifest clearance declarations (accumulative processing)	In units of 1 export manifest clearance declaration	Exist	EAM01	Applications for changes to the content of export permission (bulk change of the port of shipment)	—
CEW	Post-carry-in process for export declarations	1CE	Post-carry-in process for export declarations (automatic startup)	In units of 1 export declaration / in units of 1 export declaration of unaccompanied articles / in units of 1 export manifest clearance declaration	Exist	BII01	Registration of separate carry-in confirmation	When the entire quantity of cargo, for which export declaration of unaccompanied articles or export manifest clearance declaration has been made before carry-in, is carried in
						BIL01	Registration of bulk carry-in confirmation	
CEW	Post-carry-in process for export declarations	3EW	Post-carry-in process for export declarations (automatic startup at the office opening time)	In units of 1 export declaration / in units of 1 export declaration of unaccompanied articles / in units of 1 export manifest clearance declaration	Exist			Time-based invocation
IDC	Import declaration	1ID	Import declaration (automatic startup of the final declaration)	In units of 1 import declaration, etc.	Exist	ACH	Registration of AWB information (import)	When cargo, for which pre-arrival declaration (automatic invocation) concerning import declaration, etc., pre-arrival declaration concerning import declaration on the moment of arrival, or pre-arrival declaration concerning import declaration before cargo arrival is registered, is arrived at the warehouse planned for customs clearance, matched, or carried in, etc. by the procedures
						PKG	Registration of information about cargo confirmation	
						CAW	Correction of AWB information	
						CPK	Correction of information about cargo confirmation	
						HCH01	Registration of HAWB information (import)	
						HPK	Registration of information about consolidated cargo confirmation	
						CHA	Correction of HAWB information	
						CHP	Correction of information about consolidated cargo confirmation	
						OIN	Registration of confirmation of carry-in (bonded transportations not subject to the system)	
						KAM01	Registration of cargo shift information	
OUT	Registration of confirmation of CY carry-out (general)							
BIN01	Registration of confirmation of carry-in (bonded transportations subject to the system)							
CAI01	Registration of changes to information about import cargo							
IDC	Import declaration	3ID	Import declaration (automatic startup at the office opening time)	In units of 1 import declaration, etc.	Exist			Time-based invocation
IDC	Import declaration	1SW	Single-window import declarations (automatic startup)	In units of 1 import declaration, etc.	Exist	SWC	Single-window import declarations	—
MWC	Import declarations of shipment (carrying out of a comprehensive bonded area) of petroleum products	3MW	Import declarations of shipment (carrying out of a comprehensive bonded area) of petroleum products (automatic startup at the office opening time)	In units of 1 declaration of import from manufacturing warehouse, etc.	Exist			Time-based invocation

Original Procedure	Accumulative Processing Procedure	Processing Unit	Existence of Process Result Output	Invoked Procedure	Invocation Timing of Accumulative Processing Procedure		
CEA	Import declaration examination completion	3CE	Completion of screening of import declarations (automatic startup at the office opening time)	In units of 1 import declaration, etc.	Exist		Time-based invocation
MIC	Import manifest clearance declarations	1MI	Import manifest clearance declarations (automatic startup of the final declaration)	In units of 1 import manifest clearance declaration	Exist	ACH: Registration of AWB information (import) PKG: Registration of information about cargo confirmation CAW: Correction of AWB information CPK: Correction of information about cargo confirmation HCH01: Registration of HAWB information (import) HPK: Registration of information about consolidated cargo confirmation CHA: Correction of HAWB information CHP: Correction of information about consolidated cargo confirmation OIN: Registration of confirmation of carry-in (bonded transportations not subject to the system) KAM01: Registration of cargo shift information OUT: Registration of confirmation of CY carry-out (general) BIN01: Registration of confirmation of carry-in (bonded transportations subject to the system) CAI01: Registration of changes to information about import cargo	When cargo, for which pre-arrival declaration (automatic invocation) concerning import manifest clearance declaration, etc. or pre-arrival declaration concerning import declaration on the moment of arrival is registered, is arrived at the warehouse planned for customs clearance, matched, or carried in, etc. by the procedures
MIC	Import manifest clearance declarations	3MI	Import manifest clearance declarations (automatic startup at the office opening time)	In units of 1 import manifest clearance declaration	Exist		Time-based invocation
COW	Removal of pending	3CW	Removal of the pending status (automatic startup at the office opening time)	In units of 1 import declaration, etc.	Not exist	1CW01: Removal of the pending status (automatic startup)	Time-based invocation
COW	Removal of pending	1SR	Removal of the pending status due to collaterals (automatic startup)	In units of 1 import declaration, etc.	Not exist	SER: Security Registration	When individual securities are registered or increased for import declarations, etc. in security shortage
COW	Removal of pending	3SR	Removal of the pending status due to collaterals (automatic startup at the office opening time)	In units of 1 import declaration, etc.	Not exist	SER: Security Registration	Time-based invocation
—	—	1HA01	Automatic startup of final declarations of HAWB cargo 1	In units of 1 MAWB	Not exist	ADM01: Advance Cargo Information Registration ACH: Registration of AWB information (import) CAW: Correction of AWB information OIN: Registration of confirmation of carry-in (bonded transportations not subject to the system) KAM01: Registration of cargo shift information OUT: Registration of confirmation of CY carry-out (general)	When pre-arrival declaration concerning import declaration on the moment of arrival (in the case where cargo is delivered at a customs airport) or pre-arrival declaration concerning import declaration before cargo arrival is registered for the HAWBs pertaining to the MAWB When pre-arrival declaration concerning import declaration on the moment of arrival (in the case where cargo is delivered at a place of collecting air cargo) is registered for the HAWBs pertaining to the MAWB
—	—	1HA02	Automatic startup of final declarations of HAWB cargo 2	In units of 40 HAWBs	Not exist	1HA01: Automatic startup of final declarations of HAWB cargo 1	When pre-arrival declaration concerning import declaration on the moment of arrival or pre-arrival declaration concerning import declaration before cargo arrival is registered for the HAWBs pertaining to the MAWB
—	—	1OL	Customs Transit Declaration (accumulative processing)	In units of 1 AWBs	Not exist	PKG: Registration of information about cargo confirmation	When the PKG ULD procedure for intact cargo is processed for cargo, for which information indicating that automatic invocation of customs transit declaration is to be used is registered by the ULD Delivery Information Registration (UDA) procedure
—	—	MP1	MPN Inquiry	In units of 1 Payment Number	Not exist		When inquiry request messages from the multi-payment network are received

Original Procedure		Accumulative Processing Procedure		Processing Unit	Existence of Process Result Output	Invoked Procedure		Invocation Timing of Accumulative Processing Procedure
-	-	MP2	MPN negation	In units of 1 Payment Number	Not exist			When treasury money clearing request messages from the multi-payment network are received
				In units of 1 declaration, etc.				When the Process Results from the real-time account Web server indicating that "online real-time account withdrawal resulted in normal termination" are received
MP2	MPN negation	3MP	MPN negation (automatic startup at the office opening time)	In units of 1 Payment Number	Not exist			Time-based invocation
-	-	RB1	Confirmation of real-time direct debit results	In units of 1 declaration, etc.	Not exist			When the Process Results from the real-time account Web server are received
RP2 CPZ	Fee Receipt Confirmation Completion of screening of application for permission for entrance into and departure from closed port	1CP	Completion of screening of application for permission for entrance into and departure from closed port (automatic startup)	In units of 1 application number	Exist	RP2	Fee Receipt Confirmation	When the Process Results from REPS indicating that the payment of fees has been completed is received When granting permission for Application for permission for entrance into and departure from closed port
						RPF	Forced negation of fees	
ACE	Completion of screening of applications for the permission of examination of the cargo in places other than designated areas	1AC	Completion of screening of applications for the permission of examination of the cargo in places other than designated areas (automatic startup)	In units of 1 application number	Exist	RP2	Fee Receipt Confirmation	When the Process Results from REPS indicating that the payment of fees has been completed is received When granting permission for Applications for the permission of examination of the cargo in places other than designated areas
						RPF	Forced negation of fees	
HIG	Notifications of general application fee payment numbers	1HI	Notifications of general application fee payment numbers (automatic startup)	In units of 1 serial no. of receipt	Exist	RP2	Fee Receipt Confirmation	When the Process Results from REPS indicating that the payment of fees has been completed is received When granting permission for Applications for payment of general application fees
						RPF	Forced negation of fees	
-	-	1MT	Output of issuance of automobile customs clearance certificate	In units of 1 serial no. of receipt	Exist			When the Process Results from REPS indicating that the payment of fees has been completed is received
RP2	Fee Receipt Confirmation	3RS	Fee Receipt Confirmation (automatic startup at the office opening time)	In units of 1 Payment Numbers (fee)	Exist			Time-based invocation
PAI	Registration of permission/approval information (import clearance)	1CH	Completion of screening of general applications (accumulative processing)	In units of 1 general application receipt number	Exist			When the registration of examination completion of General Application is processed with Permission/Application, etc. Information Registration (import clearance)
PAE	Registration of permission/approval information (export clearance)	1CH	Completion of screening of general applications (accumulative processing)	In units of 1 general application receipt number	Exist			When the registration of examination completion of General Application is processed with Permission/Application, etc. Information Registration (export clearance)
IFA	Registration of items on the report concerning the import of foods	1FA	Registration of items on the report concerning the import of foods (Automatic Invocation Processing)	In units of 1 notification number	Exist	SWA	Registration of items on single-window import declarations	When Foods, etc. Import Notification Registration is processed with Single Window Registration of items on import declarations
IFC	Report concerning the import of foods	1FC	Report concerning the import of foods (Automatic Invocation Processing)	In units of 1 notification number	Exist	SWC	Single-window import declarations	When the information on the import declaration made is linked to the information on Foods, etc. Import Notification

Original Procedure	Accumulative Processing Procedure	Processing Unit	Existence of Process Result Output	Invoked Procedure	Invocation Timing of Accumulative Processing Procedure			
IFC	Report concerning the import of foods	3IF	Report concerning the import of foods (fixed time automatic invocation)	In units of 1 notification number	Exist		Time-based invocation	
ILC	Applications for the examination of imported livestock products	1IL	Examination of imported livestock products (Automatic Invocation Processing of post-arrival applications)	In units of applications	Not exist	PKG	Registration of information about cargo confirmation	When cargo, for which information indicating that automatic invocation of application after the Arrival of imported animal products is to be made is registered, is matched or carried in, etc. by the procedure
						CPK	Correction of information about cargo confirmation	
						HPK	Registration of information about consolidated cargo confirmation	
						CHP	Correction of information about consolidated cargo confirmation	
						OIN	Registration of confirmation of carry-in (bonded transportations not subject to the system)	
						ACH	Registration of AWB information (import)	
						CAW	Correction of AWB information	
						HCH01	Registration of HAWB information (import)	
						CHA	Correction of HAWB information	
						CAI01	Registration of changes to information about import cargo	
SIK	Tax amount registration	1SK	Tax amount registration (automatic invocation)	In units of applications	Not exist	RPC	Applications for payment of general application fees	when the application for "International Tourist Tax"
—	—	1COPR	Output of certificate of origin information reports	In units of user/In units of "N-C/O number"	Not exist	IDC	Import declaration	When the application for electronic certificate of origin for import declarations
						1ID	Import declaration (automatic startup of the final declaration)	
						3ID	Import declaration (automatic startup at the office opening time)	
						CEA	Import declaration examination completion	
						CEA01	Completion of screening of import declarations (forced input)	
						COW	Removal of pending	
						1CW01	Removal of the pending status (automatic startup)	
						3CW	Removal of the pending status (automatic startup at the office opening time)	
						1SR	Removal of the pending status due to collaterals (automatic	
						3SR	Removal of the pending status due to collaterals (automatic startup at the office opening time)	
						RCC	Confirmation of receipt	
						RCC20	Confirmation of receipt (forced input)	
						RCC01	Confirmation of receipt (forced input by other stations)	
						RCC30	Confirmation of receipt (bar code reader)	
						RCC40	Confirmation of receipt and registration of receipt notices (bar code reader)	
						GFG	Registration of deducted settlements and losses due to	
						GFG20	Registration of deducted settlements and losses due to nonpayment (forced input)	
						MPF	Forced MPN negation	
						MP2	MPN negation	
						3MP	MPN negation (automatic startup at the office opening time)	
1COPR	Output of certificate of origin information reports							
—	—	1MT	Output of issuance of automobile customs clearance	In units of application for certificate	Exist	MTD	Completion of screening of issuance of automobile customs clearance certificate	when issuance of automobile customs clearance certificate
